GENERAL FEATURES

BRUSHLESS MOTOR

Torque motor with higher efficiency and smoother operation.

DOUBLE REDUCTION GEAR SYSTEM

To provide a double gear output, the polisher allows low speed and high torque for heat sensitive surfaces.

BRUSHLESS MOTOR

LITHIUM-ION BATTERY

1500 /min SPEED

SMART CONTROL

DOUBLE REDUCTION

ACCELERATION CONTROL

EASY GRIP

Ergonomic soft grip handle.

Ergonomic handle to optimise handling and reduce operator fatigue when polishing.

BPC 7121

CORDLESS ORBITAL
POLISHER

21 mm

18V 6"(150mm) 2000-5000/min

ERGONOMIC DESIGN

The machine can be precisely controlled and is always comfortable and safe to hold. The operator can polish at any angle and in any position with a constant good handling.

CAPACITY

5.0
Ah

WORKING TIME

60-90
min.

FULL CHARGE

60
min.

- **HIGH QUALITY BATTERY CORE**
- **DUAL CHANNEL CHARGER**
- **A CURRENT OF 6.5 A IS SUPPORTED FOR CHARGING, FULLY CHARGED IN 1 HOUR.**

AIRCOOL TECHNOLOGY

Battery packs and charger with Aircool technology have an integrated cooling channel, which keeps the battery pack and charger cool.

18V

LITHIUM-ION BATTERY

Robust power with long runtime

LOCKING SYSTEM

Accessible from the gearbox cover for easy replacement of the rear plate.

MAXIMUM SMART CONTROL PERFORMANCE

Constant speed output from digital control technology under load.

Smooth start-up. Reduces polishing compound splashes. Overload protection.

Protect the machine, extend the service life.

DUAL SPEED REGULATION SYSTEM

Pre-setting continuous speed:

Acceleration control:

Free and precise control in dynamic switching between high and low speed.

POLISHER BPC 7121

The polisher BPC 7121 is a cordless machine, it is designed and built for Lithium battery, professionally manufactured.

5.0 Ah battery not included.

MODEL: BPC 7121

ORBIT SIZE: 12 MM/15 MM/21 MM

BACK PLATE: 3 INCHES/5 INCHES/6 INCHES

FOAM PAD: 4 INCHES/6 INCHES/7 INCHES

WEIGHT: 1,83 KG-2,14 KG

UNLOADED SPEED: 2000-5000 OPM

VOLTAGE: 18 VDC

RECOMMENDED TEMPERATURE: +4 °C A +40 °C

ACCESSORIES: BACK PLATE, INSTRUCTIONS FOR USE

POLISHER BPC 7102

The BPC 7102 rotary cordless polisher is professionally designed and manufactured for polishing work in the automotive and industrial sectors. 5.0 Ah battery not included.

MODEL: BPC 7102

BACKING PLATE: 5 INCHES/6 INCHES

FOAM PAD: 6 INCHES/7 INCHES

WEIGHT: 1.70KG, 1.73KG

UNLOADED SPEED: 700-1500/MIN

GEAR SYSTEM: DOUBLE REDUCTION

OUTPUT SHAFT: M14

VOLTAGE: 18VDC 18VDC

RECOMMENDED TEMPERATURE: +4 °C A +40 °C

ACCESSORIES: 5" BACK PLATE, SIDE
INSTRUCCIONES DE USO

POLISHER BPC 6012

The polisher BPC 6012 is an eccentric battery polisher with 12 mm orbit, very ergonomic, light and easy to handle.

Its design allows to work comfortably in all areas of the vehicle with less fatigue and saturation to the operator.

Particularly effective due to its precise and smooth orbit, especially in precision work on dark colours to remove holograms. 2.5 Ah battery not included.

MODEL: BPC 6012
BACKING PLATE: MAX. 123 MM. (5")
FOAM PAD: MAX. 150 MM. (6")
WEIGHT: 1.60 KG
UNLOADED SPEED: 500 - 1800/ MIN
TENSION: 18VDC
THREAD M14
ACCESSORIES: 5" SUPPORT PLATE, SIDE HANDLE,
INSTRUCTIONS FOR USE.

Includes all accessories: (1, 2 and 3 inch plates, Foam pads, Wool Pads, Microfiber Pads, Extension bars, Side Handle and Wrench).

ACCESSORIES

KIT MICRO POLISHING EXTENSIBLE

Multi-accessory flexible shaft polishing tool kit, designed for detail polishing in polishing processes with a high possibility of access to difficult areas of the bodywork, e.g. door and interior trims.

Accessories: Foam pads, wool pads and cones. Recommended for rotary polishers.

PAD: 3 MM
PAD MAX.: 27 MM
MAX. SPEED 4000 / MIN

FLEXIBLE PLATES FOR POLISHERS

Flexible and balanced plates for polishing processes in automotive refinishing. Their flexible edges are ideal for polishing vehicle contours of the vehicle where greater accessibility is required. They are suitable for sponges and polishing pads.

PLATE FOR BPC 7121 POLISHER

The Foam Plate 6" 150mm, for polisher BPC 7121 is especially important for the broken orbital system. It is constructed of polyurethane foam with a very good mechanical strength to withstand lateral and rotational movements.

This plate in conjunction with our CRS conical polishing sponges performs a gentle and comfortable polishing. The holes in the plate allow to keep the working area clean while promoting better cooling. The plate is perfectly designed to obtain a perfect anchorage between the sponge and its base.

TOOLS & UTENSILS BAG

Bag for storage and transport of tools and polishing utensils, such as polishers, plates, polishing pads and accessories. Available in two sizes.
