

SMART PROGRESSIVE ABRASION PLUS

CAR  
REPAIR  
SYSTEM

SPA PLUS (Smart Progressive Abrasion Plus). It is a working philosophy for development in the process of defect rectification in refinishing, marking the beginning of a new era of innovation, flexibility and versatility.

COMPOUNDING  
REPAIR

The simple handling and easy application of these polishing products will facilitate greater efficiency and time savings in the body shop, thus offering a wide range of alternatives for multiple polishing processes and needs.

Due to the formulation and development of the SPA (Smart Progressive Abrasion) system, we avoid the chemical filling of abrasive defects in paint refinishing, which traditionally reappear in the form of shading or visual marks, achieving incredible and long-lasting results in car refinishing.

**1 - PLUS:** These polishes are developed with a technology of spherical abrasive micro particles of different sizes of fast cutting which intervene in the polishing process, causing a progressive cutting action.

**2 - PLUS:** It is no longer necessary to have different polishes for the same polishing process. This avoids complex processes that lead to application errors and unsatisfactory results.

**3- PLUS:** With the SPA PLUS system, we achieve savings and efficiency in the workshop when looking for processes focused on profitability.

**4 - PLUS:** These polishes are specially indicated for varnishes and finishes of the latest generation, including fast drying or air drying systems. We can also achieve a higher resolution and quality in complex colours.

# POLISHING SYSTEM

Car Repair System introduces a new polishing system. The new formulation concept will increase the efficiency of the polishing process and will optimise the professional's experience in an easy and fast way in the steps to be performed.

This system has a multifunctional character in the abrasive compound that will enhance the abrasive that will enhance the cleaning approach and results, offering optimum performance with low environmental impact.

A polishing process with a single product in 2 steps which results with a very fast cutting time and ease of application for the operator.

- ✓ **FAST AND EFFICIENT**
- ✓ **DURABLE**
- ✓ **HOLOGRAM FREE**

## DIAMOND PLUS

An emulsion polish with micro-abrasive, fast-cutting abrasive particles, particularly suitable for the **latest generation of lacquers and topcoats finishes**; including the new fast drying or air drying systems.

- Its chemical composition together with its applicator of *Orange Micro Fibres*, allows a cut and high gloss finish in a single step.
- Easily removes sanding marks from P1200 and above and provides a **deep gloss finish**.

Combined in the finishing phase with the Roto orbital polisher *SPC 7121 (1014-005006)* and our *Medium Grey Pad (2004-007020)*, we correct the polishing marks from Phase 1 and prevent the appearance of holograms.

**POLISHING  
PROCESS**

**STEP**

**1**

**POLISHER SPC 7102**

REF. 1014 - 005002

**ORANGE WOOL PAD**

REF. 2004 - 000101

1. PLACE THE ORANGE WOOL PAD IN THE POLISHING MACHINE.

2. SHAKE THE DIAMOND PLUS POT BEFORE USE.

3. APPLY A SMALL AMOUNT OF PRODUCT TO THE PAD OR SURFACE.

4. POLISH AT 1000-1400 RPM

5. WIPE WITH A CLEAN DRY FINISHING CLOTH.

**STEP**

**2**

**POLISHER SPC 7121**

REF. 1014 - 005006

**GREY MEDIUM PAD**

REF. 2004 - 007020

1. PLACE THE GREY MEDIUM PAD IN THE POLISHER.

2. SHAKE THE DIAMOND PLUS CAN BEFORE USE.

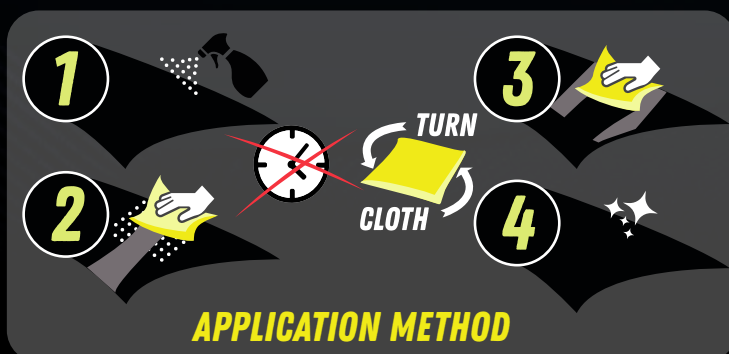

3. APPLY A SMALL AMOUNT OF PRODUCT TO THE SPONGE OR SURFACE.

4. POLISH AT 1000-2500 RPM

5. WIPE WITH A CLEAN DRY FINISHING CLOTH.

## NANO FLASH PROTECT

A liquid compound for protection and finishing. This amazing product offers a **fast protective coating** to any vehicle surface thanks to its **nano-particles that repel water**, dust and environmental pollutants, which provides a longer life to the treated surface.

**APPLICATION METHOD**

## ONIX PLUS

ONIX PLUS is an emulsion polish with abrasive micro-particles with maximum cutting power and gloss, especially suitable for paint finishing work on cured painted surfaces, resistant to deep scratches.

- Maximum cutting power and gloss.
- Does not dry out the polishing paste.
- Low temperature emission.
- The paste is free of waxes, silicones and unpleasant odours.

## CRYSTAL PLUS

Crystal Plus is a micro finish polish based on highly refined aluminium oxide. Thanks to SPA (Smart Progressive Abrasion) technology, Crystal Plus efficiently removes micro fine scratches, swirl marks and holograms on dark car paints.

Crystal Plus provides an excellent final finish and leaves an outstanding mirror-like deep gloss. The simple handling and easy application of Crystal Plus will facilitate greater efficiency and time savings in the body shop.
