INTERNATIONAL PRESENCE

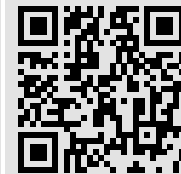

Car Repair System group is present in the international market through its subsidiaries in Spain, France, Italy, and Portugal. It also has various import agreements for distribution in around 20 countries worldwide and maintains a commercial network of over 1,000 distributors.

QUALITY AS A WORK SYSTEM

Sistema de
Gestión
ISO 9001:2015

www.tuv.com
ID 9105011909

Since its inception, Car Repair System's priority has been to ensure the quality of its products and services. The R+D+i team continuously updates its products, striving to stay at the forefront of the industry. Currently, the company has successfully implemented a new integrated system to oversee Quality and R+D+i management.

FILL MULTISOFT

Fill Multisoft has been designed for use on glass fibre reinforced plastics and steel. The appropriate hardness of the sealant to the hardness of the paint and the smooth non-porous surface allows this product to be used as a filler and finisher. Easy to work even on homogeneous surfaces even when thick coats are applied.

FILL UNIVERSAL SOFT

Universal polyester filler for levelling and filling imperfections in car bodywork, plastic components (bumpers) and galvanised bodies. The appropriate hardness of the putty to the hardness of the paint and the smooth non-porous surface allows the use of this product as a filler and finishing putty. Good adhesion to rough and dry surfaces. Easy to work also with homogeneous surfaces, even when applying thick layers. Good modelling properties in any required thickness.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001096	BEIGE	500 G	12 UN

FILL MULTILIGHT PLUS

Low specific weight polyester putty with a very creamy texture. VOC content less than 250 g/l, limit of the European standard category and very creamy texture. Easy application with a spatula with an exceptionally smooth finish.

Putty with adherent charges and resins over aluminium and galvanised.

CARTRIDGE DISPENSER 1100 ML

**TOOLS &
ACCESSORIES**

FILL LIGHT PLUS

Exceptionally low weight ultra-light filler, that allows for exceptional sanding, minimum humidity absorption and has great adhesive power over Zinc and Tin. Since it contains no mineral charges, the dust is significantly reduced during sanding in comparison to other traditional fillers. Putty with adherent charges and resins over aluminium.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001082	BLUE	1000 ML	12 UN

FILL UNIVERSAL

Fill Universal Light characterized by good adhesion to different surfaces; metal, aluminium, galvanized, wood and polyester laminates. Very soft and easy to sand, the density is 45 % lower than traditional putty. For filling in deep uneven areas and dents on motor vehicle bodywork in the area of cars, lorries, buses and railway vehicles.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001098	BEIGE	1250 ML	6 UN
5001-001090	BEIGE	1000 ML	12 UN
5001-001099	BEIGE	850 ML	6 UN

FILL METAL

Polyester filling with a high-density content of aluminium that makes it strongly adhesive on steel, galvanised steel, aluminium, fibreglass, wood, etc. It offers good corrosion protection.

Strong filling power, flexible and easy to sand.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001125	SILVER	1,5 KG	12 UN

FILL ALU TIN

Putty based on polyester resin and special fillers such as 2-3 mm aluminum lamellae, in various grain sizes, which offer great adhesion, hardness, heat resistance, resistance to water, fuels and chemicals. oils.

It has exceptional anticorrosive power and is a substitute for aluminum and tin sealants. Thanks to its laminar structure, it can even be mechanized. Ideal for large thicknesses, to protect welded sheets from corrosion. Once sanded it acquires a metallic appearance.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001130	SILVER	1,5 KG	6 UN

FILL PLAS

Polyester putty with plastic fibre fillers especially indicated for touching up and small damages in plastic parts of the car.

Its particular composition allows an exceptional adhesion (even on polypropylene and metal), and excellent sanding and flexibility.

Its low specific weight allows repairs to be carried out with a minimal increase in the weight of the support being repaired.

REFERENCE	COLOUR	CAPACITY	BOX
5006-001126	DARK GREY	1,5 KG	12 UN

FILL FLEX

Highly elastic multifunctional putty specially designed for application on plastic substrates, including polypropylene. It also adheres to metal substrates such as steel, galvanised steel and aluminium as well as polyester surfaces.

Easy application and modelling. Can be used as a filler and as a fine putty and provides a non-sanding and easy to sand coating.

REFERENCE	COLOUR	CAPACITY	BOX
5006-001081	DARK GREY	1 KG	10 UN

QUICK MIX 4013

2-tube composite epoxy for use in the repair of all types of plastics (including olefinic plastics such as TPO, PP, XENOY and PPO). Easy sanding. 100% sólids. No pinholes. Compatible with all types of primers. VOC content: 0 %.

- Mixed 1:1 (OEM approved and used).
- Working time at 22 °C (75 °F): 10 to 12 minutes.
- Sanding in 30 minutes at 22°C (75 °F).

Multi-purpose adhesive (bonds: glass, metal, wood, fibreglass, SMC and plastics).

REFERENCE	COLOUR	CAPACITY	BOX
5006-006029	BLUE	2X 250 G	3 UN

FILL BLACK CARBON

Black polyester putty for the repair of carbon parts. It is characterised by its creamy consistency which allows it to work easily and to sand with high abrasive granulation. It has a hardness suitable for automotive coating, as well as the elimination of crossovers between the putty and the repaired surface.

- Fast drying.
- Easy application and sanding, even on surfaces with complicated shapes or thicker layers.
- Compatible with any filler or primer. Paste catalyst included.
- Mixing ratio 2/3 %.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001455	BLACK	1,3 KG	10 UN

FILL GLASS

Putty based on polyester resin and special fillers such as fiberglass. For the repair of major damage, where a significant load is required.

Easy sanding.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001031	GREEN	1,8 KG	10 UN

FILL GLASS 500 GR

Fibreglass putty characterised by a special ease of modelling and high abrasive granularity. The possibility of using the high abrasive granularity and the adaptation of the putty hardness to painted coatings eliminates the formation of transition between the putty and the repaired surface.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001030	GREEN	500 G	12 UN

FILL GLASS PLUS

Special fibreglass filler. Suitable for repairing GRP, for filling very deep unevenness and as a first coat for repairing small rust stains. Adhesion on metal surfaces.

Easy sanding.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001097	BROWN	1,4 KG	6 UN

HE FILL ULTRA GLASS

Ultra lightweight polyester putty reinforced with glass fibers for repairs where a high filling power is required, between 2 and 4 millimeters, very easy to apply due to its soft density. It can be sanded with grains such as P120-P150.

Allows an exceccional finish ready to prime as a finishing putty.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001002	YELLOW	1 L	12 UN

FILL POLISPRAY

Polyester filler for 2-component spray application, for filling of surfaces, shallow sanding marks and scratches. Fast drying. Easy to sand. Catalyst included.

REFERENCIA	COLOR	CAPACITY	BOX
5001-000032	LIGHT GREY	1,5 KG	6 UN

1 1001-000003 APPLY WITH RETOUCH GUN PRO MINI 10

TOOLS & ACCESORIES

PUTTY NITRO 1K

One-component nitro filler for filling pores and small scratches. Composed of fine-grained paste, it is particularly suitable for touch-up work: small defects, pinholes, porosity and light scratches.

Fast drying. Good adhesion. Easy sanding.

REFERENCE	COLOUR	CAPACITY	BOX
5000-000001	GREY	180 G	24 UN

KIT FIBER REPAIR

Kit for fixing fibreglass, metal and other materials. Best used for general repair on industrial vehicles or auto bodywork, as well as tuning. Includes:

- Fill fiber resin 750ml.
- Hardener for polyester resin 25ml.
- Accelerator for resin 25ml.
- Fibreglass cloth.0.5 m².
- Mixing cup 275 ml.
- Triple brush 30mm.

QUICK SEAL

Single-component polyurethane adhesive for direct windscreen gluing. Viscous sealer with dynamic drying. Polymerises whilst in contact with humidity.

- Apply with a manual or air extrusion gun.
- Skin forming time: 40 min.
- Delivery of vehicle without airbag: 2 hours and with airbag: 6 hours.

REFERENCE	COLOUR	CAPACITY	BOX
5002-001062	BLACK	310 ML	12 UN

QUICK SEAL PLUS

Polyurethane quick adhesive for direct windscreen gluing. Viscous sealant with dynamic drying.

- Skin forming time: 25 min.
- Delivery of vehicle without airbag: 1,5 hour and with airbag: 3 hours.

REFERENCE	COLOUR	CAPACITY	BOX
5002-001045	BLACK	310 ML	12 UN

QUICK SEAL MS 974

Quick single-component adhesive made of MS polymer, a next-generation product for direct windscreen gluing, with high thixotropic properties and dynamic drying.

No need to use with *Quick Primer Glass*.

REFERENCE	COLOUR	CAPACITY	BOX
5002-001107	BLACK	290 ML	12 UN

KIT QUICK SEAL / SEAL PLUS

GLASS PRIMER

ONE STEP GLASS PRIMER

Black primer that forms a hard and opaque film once dry, improving its adhesion on polyurethane adhesives during gluing of glass, varnish and plastic (PVC, ABS, PMMA and SMC).
It also provides UV protection.

Do not apply on PU RIM or pre-applied PU or old polyurethane.

REFERENCE	COLOUR	CAPACITY	BOX
5002-001110	BLACK	10 ML	24 UN

PRIMER/ACTIVATOR

QUICK PRIMER Y ACTIV GLASS

Universal primer and activator for glass surfaces, ceramic screen printing and painted surfaces..
Quick Primer van be used in the automotive industry to improve the adhesion of polyurethane sealants on screen printed ceramic glass.
Activator can be used as a cleaning agent and adhesion promoter for PU sealants (for windscreen or other applications), hybrid sealants (MS or SPUR) or silicones.

REFERENCE	DESCRIPTION	CAPACITY	BOX

TOOLS & ACCESSORIES

QUICK METAL BONDING

Two-component epoxy based adhesive for quick sealing to fix metal to metal. It is specially designed to replace non-structural panels such as roofs, doors, side panels, etc. The product bonds to steel, galvanised steel and aluminium. The texture includes 0.25mm glass beads to ensure minimal product in the pressure and grip areas. Supplied with a mixing cannula. Apply with a conventional sealant gun. Dries at room temperature but can be accelerated with heat.

- Shelf life 60min. Can be handled for 4 hours. Total cure 24 hours. (23 °C).
- Withstands temperatures up to 230°C.
- Welding conductive before curing.

ULTRA FAST METAL BONDING

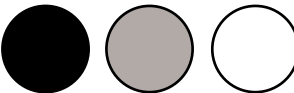

Ultra fast metal bonding is a high strength, rapid curing, methyl methacrylate, structural adhesive, which gives a tough durable bond with plastics, metals and other materials. It is isocyanate, phthalates, solvent, PVC and silicone free.

Very good UV resistance and excellent ageing properties.

REFERENCE	COLOUR	CAPACITY	BOX
5006-001082	BLACK	50 ML	6 UN

1) 5006-001097 MIXER 50 ML BLUE **TOOLS & ACCESSORIES**

QUICK FILL PLUS

One-part, very fast curing, polyurethane elastic adhesive and sealant designed for car body construction and repair. Thanks to its thixotropy and outstanding body meets most demanding requirements in sealing and bonding industrial applications. Thanks to its special formulation, it is completely odorless. Quick Fill Plus is suitable for sealing seams such as welds, simple and demanding joints in all types of vehicle bodywork and sheet metal and panel replacement.

REFERENCE	COLOUR	CAPACITY	BOX
5003-001055	WHITE	310 ML	12 UN

5003-001057	GREY	310 ML	12 UN

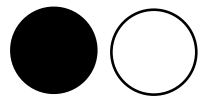

QUICK FILL BRUSH

Single-component sealer for leak-free gaskets to be used with a brush. Fast drying. Overpaintable with any kind of paint system once totally dry.

It is applied on welding points or lines on the front and rear of the body, the boot bottom and the passenger compartment bottom.

Dries quickly, can be accelerated in an oven, does not crack and provides an excellent barrier against water and moisture infiltration into joints.

REFERENCE	COLOUR	CAPACITY	BOX
5003-001037	GREY	1 KG	12 UN

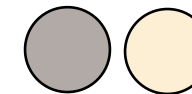

QUICK MS ECO

Ecopolymeric multifunctional single-component sealer. VOC content: 0%. Does not turn yellow over time. Immediately overpaintable (wet on wet) , does not get reduced after the application.

Permanent elastic. Good UV, weather and mildew resistant. Excellent adhesion on wet surfaces

REFERENCE	DESCRIPTION	CAPACITY	BOX
5003-006032	966 WHITE	290 ML	12 UN
5003-006038	965 BLACK	290 ML	12 UN

QUICK FLEX MS

Single-component bodywork sealer spray to be used on different metallic (steel, galvanised steel, stainless steel, tin), painted or primed surfaces and plastic materials. Elastic. Immediately overpaintable.

Suitable for overpainting with many varnishes within 5 days after application.

REFERENCE	COLOUR	CAPACITY	BOX

BUTYL CORD

Butyl cord is a pressure sensitive polymer tape, preformed in different sections, designed for sealing various materials (e. g. degreased sheet, primed, galvanised, on itself or with glass, wood, plastic materials such as EPDM, PE, PP, TPO), where an effective moisture barrier is needed. Fabricated for sealing joints, headlights, stirrups, etc. Moisture protection and acoustic isolation.

Thickness: 8 mm / 4 mm and length 4.5 m per roll.

REFERENCE	SIZE	CAPACITY	BOX
5003-000001	8 MM	ROLL	8 UN
5003-000003	4 MM	ROLL	8 UN

BUTYL FILLER

It's a butyl based sealer with good characteristics of adhesion, cohesion and elasticity.

It's mainly used in building industry for sealing aluminium and glass casing, where is necessary resistance to water and air passage.

Thanks to its adhesion and good E-modulus, it absorbs excellently thermal expansion of the structures. Masilla de Butilo is also used for sealing box-type parts, sheet junctions, EPDM seals, etc.

REFERENCE	COLOUR	CAPACITY	BOX
5003-001002	BLACK	300 ML	12 UN

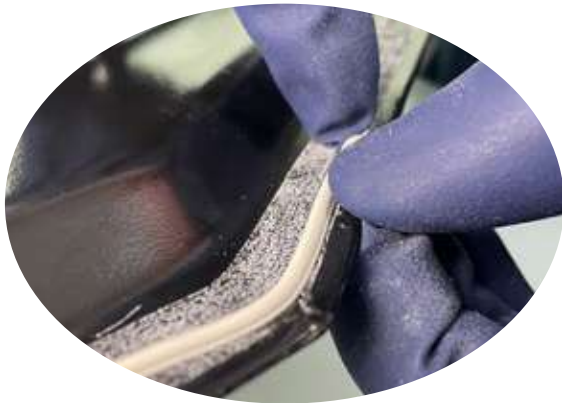

SEAM SEALER TAPE

The Seam sealer tape guarantees an original finish and can be used to seal door panels, boots, bonnets, etc. It should always be used with the Seam sealer Primer.

Recommended for application with a *Seam sealer tape Roller*.

STONE CHIP PROTECTION KS-2000

KS-2000 is a one-component, textured, high-performance, single-component HS antigravel for the coating of surfaces subject to exposure to moisture, impact, salt spray and rust.

It is a ready-to-use, thixotropic product with a high covering power, perfect for corrosion protection on wheel arches, underbody, footboards, engine compartments, etc.

STONE CHIP PROTECTION HS-3000

Stone Chip Protective with high sound-proof power, which looks like orange peel. It is used for remaking and for rust-preventing, anti-corrosive and anti-abrasive treatment of car bodies, sidebands, spoilers, and other parts of the vehicle which are usually exposed to some particular stress. Protects from damp, from salt and from rubble-abrasion. After hardening, it is very elastic. Repaintable after 15 minutes (max. 5 hours).

5008-001072	GREY	1 KG	12 UN
5008-001071	WHITE	1 KG	12 UN

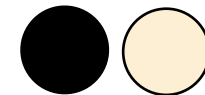

QUICK SHIELD POLYMER

Polymer based stone chip sealer with excellent structure and flexibility. Excellent protection, anti-corrosion and ability to reproduce different textured finishes depending on the distance and load during application.

Recoatable with any system, Very good adhesion to a wide range of substrates and very good resistance to weathering, water spray and abrasion.

REFERENCE	COLOUR	CAPACITY	BOX
5008-001055	BLACK	500 ML	12 UN
5008-001058	GREY	500 ML	12 UN
5008-001059	WHITE	500 ML	12 UN

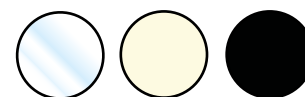

QUICK SHIELD 2K PU + HARDENER

Two-component polyurethane "HS" anti-stack, ideal for restoring bodywork protection and sealing. It can be applied directly on metal, prepared primers, paints or reinforced resins. The can is designed so that the metal top cap can be opened completely, thus facilitating the correct mixing of both products.

Applicable with standard anti-gravel gun or disposable caps.

5008-001039	BEIGE	375 G + 125 G	12 UN

QUICK WAX

Cavity protection wax against corrosion, especially suitable for places such as interior door panels, headlights, bumpers, bonnets, boot lids, etc. Excellent penetration characteristics in hard to reach recesses.

Self-repairing properties in case of minor damage. Excellent adhesion and resistant against environmental influences, weak acids and bases.

SOUNDPROOF SHEETS

A self-adhesive bitumen sound insulation board made of a mixture of bitumen, elastomer and fillers with variable granulometry; it is an acoustic insulation product aimed at airborne noise reduction and impact noise insulation; it is laminated to a solvent-free modified acrylic adhesive.

It is particularly suitable for applications where moderate flexibility is required at room temperature. It can be laid on flat or slightly curved surfaces during application.

FILL PLAS

Polyester putty with plastic fibre fillers especially indicated for touching up and small damages in plastic parts of the car.

Its particular composition allows an exceptional adhesion (even on polypropylene and metal), and excellent sanding and flexibility.

Its low specific weight allows repairs to be carried out with a minimal increase in the weight of the support being repaired.

REFERENCE	COLOUR	CAPACITY	BOX
5006-001126	DARK GREY	1,5 KG	12 UN

FILL FLEX

Highly elastic multifunctional putty specially designed for application on plastic substrates, including polypropylene. It also adheres to metal substrates such as steel, galvanised steel and aluminium as well as polyester surfaces.

Easy application and modelling. Can be used as a filler and as a fine putty and provides a non-sanding and easy to sand coating.

REFERENCE	COLOUR	CAPACITY	BOX
5006-001081	DARK GREY	1 KG	10 UN

QUICK MIX 4013

2-tube composite epoxy for use in the repair of all types of plastics (including olefinic plastics such as TPO, PP, XENOY and PPO). Easy sanding. 100% sólids. No pinholes. Compatible with all types of primers. VOC content: 0 %.

- Mixed 1:1 (OEM approved and used).
- Working time at 22 °C (75 °F): 10 to 12 minutes.
- Sanding in 30 minutes at 22°C (75 °F).

Multi-purpose adhesive (bonds: glass, metal, wood, fibreglass, SMC and plastics).

REFERENCE	COLOUR	CAPACITY	BOX

5004-001037	GREY	1000 ML	12 UN

**QUICK RCOLOR**

One component product offering excellent adhesion to most plastic surfaces used in the manufacture of car bumpers (polypropylene, polycarbonate, ABS, Pocan, xenoy, rigid polyurethane, glass reinforced polyester, etc. except polyethylene and blends containing this material). Semi-matt appearance like original bumpers. Fast drying, high adhesion and excellent resistance to washing and weathering.

REFERENCE	COLOUR	CAPACITY	BOX
5004-002047	BLACK	1000 ML	6 UN

QUICK TEX

Single-component textured paint spray to paint bumpers and other plastic surfaces for a rough finish. Creates a thin protective shield. Overpaintable.

Very fast drying, good adhesion, easy application and recoating, and high hiding power.

REFERENCE	COLOUR	CAPACITY	BOX
5004-001034	BLACK	400 ML	12 UN
5004-001049	GREY	400 ML	12 UN

STRUCTURE COAT

Textured spray that restores structure to damaged plastics or exterior car parts such as dashboards, trim, centre console and running boards.

Reproduction of structure on damaged plastics and plastic parts. Easy and time-saving application.

Suitable for both exterior and interior plastic car parts.

REFERENCE	COLOUR	CAPACITY	BOX
5004-001051	BLACK	400 ML	6 UN

**QUICK RCOLOR**

High quality paint formulated with nitro combined resins, in order to obtain a textured finish, suitable for bumpers. Very fast drying, lead free and good adhesion.

Easy application and recoating. High scratch resistance after polymerization of film. Excellent elasticity.

REFERENCE	COLOUR	CAPACITY	BOX
5004-001047	BLACK	400 ML	12 UN
5004-001048	DARK GREY	400 ML	12 UN

QUICK PLASTIC PRIMER

It's a one-component adhesion promoter for plastics.

This fast clear primer is suitable for all types of paintable plastic substrates, thus avoiding the need to identify the type of plastic before painting.

REFERENCE	COLOUR	CAPACITY	BOX
5004-001107	COLOURLESS	1000 ML	12 UN

QUICK PLASTIC PRIMER

Adhesion primer based on a special additive solution providing improved adhesion on plastics.

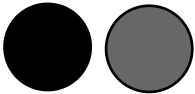

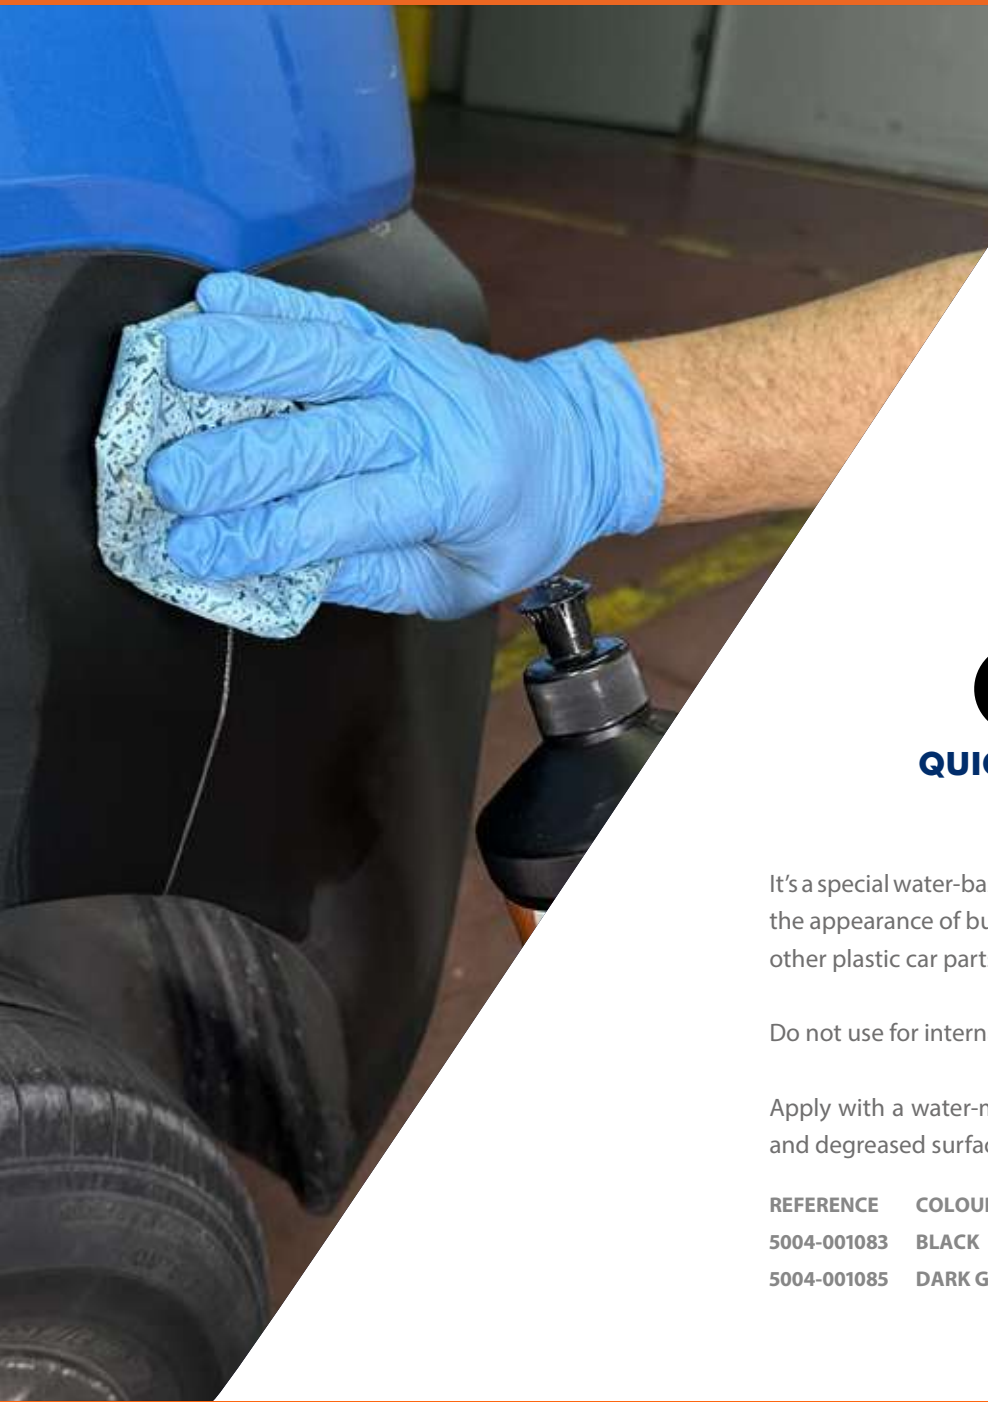

Suitable as adhesion promoter in spray painting systems. Its power as an adhesion promoter on various surfaces makes it ideal in plastic painting.

- Very fast Drying, after 10 minutes.
- Ease of application and repainting.
- Excellent adhesion on polypropylene.

REFERENCE	COLOUR	CAPACITY	BOX
5006-001086	COLOURLESS	400 ML	12 UN

PLASTIC RENOVATING POLISHES

QUICK PLAST-GEL

It's a special water-based pigmented product for renewing the appearance of bumpers, spoilers, side mouldings and other plastic car parts with long-term effect.

Do not use for internal parts.

Apply with a water-moistened sponge on clean, washed and degreased surfaces.

REFERENCE	COLOUR	CAPACITY	BOX
5004-001083	BLACK	1000 ML	6 UN
5004-001085	DARK GREY	1000 ML	6 UN

QUICK RSTORE

Refurbishing gel for exterior plastics (bumpers, spoilers, mirror housings, mouldings, etc.), rubber and rubber, giving them a new look. Easy and quick to use. Treated surfaces are not tacky to prevent dust pick-up and therefore will not attract dirt. It's also durable, and it will withstand repeated washing to maintain showroom appearance on outside sales vehicle displays. Silicon free.

QUICK RALLY BLACK

Quick Rally Black is a nitro-based, plastified, single-component acrylic paint for surface repainting.

Available in three finishes: matt, satin or gloss.

REFERENCE	COLOUR	CAPACITY	BOX
5004-006023	MATT	1000 ML	12 UN
5004-006024	SATIN	1000 ML	12 UN
5004-006039	GLOSS	1000 ML	12 UN

Two-component acrylic coating with resistant finish and rough/ ultra textured effect.

It is ideal for coating surfaces subjected to high mechanical resistance exposed to impact, friction and abrasion over time. It stands out for its excellent resistance to scratching, abrasion and folding. It is also resistant to chemical agents such as hydrocarbons and acetones. It has a short drying time and acquires its maximum mechanical resistance in a short period of time, withstanding impacts, scratches and exposure to the elements.

HE FILL ULTRA GLASS

Ultra lightweight polyester putty reinforced with glass fibers for repairs where a high filling power is required, between 2 and 4 millimeters, very easy to apply due to its soft density.

It can be sanded with grains such as P120-P150.
Allows an exceccional finish ready to prime as a finishing putty.

REFERENCE	COLOUR	CAPACITY	BOX
5001-001002	YELLOW	1L	12 UN

HE WASH PRIMER

Primer/adhesion promoter. It has an excellent adhesion especially on white sanded metal, e.g. steel sheet, as well as aluminum, galvanized, and zinc-coated. Active anti-corrosion pigments provide the best protection. Fast drying. Can also be used as a welding primer.

For an optimal preparation of the damaged area on metal surfaces, it must be thoroughly cleaned with a silicon remover beforehand.

**HE ULTRA TEX 2K**

20°C - 60'
60°C - 10'

Two-component textured HE ultra tex 2K.

It stands out for its excellent physical, mechanical and adhesive resistance without primer or adhesion promoters for plastics and its homogeneous and original textured finish.

In addition, it provides great hardness and resistance to friction and deterioration, which allows a very good protection against exposure and environmental impact suffered by this type of components.

The drying time at 20° is 1h, while the drying time in the booth at 60° is reduced to 20 minutes.

FILLER & PRIMERS

Filler and Primers brings together in one family our latest generation fillers and primers, characterised mainly by their high filling power and anti-corrosion properties.

SUBFAMILY	NAME	COLOUR	APPLICATION MEDIUM	MIXING RATIO	REDUCTION	POT LIFE	MICRAGE	TIME TO RECOATING /SANDING	DRYING TIME	PAGE
PRIMERS	QUICK ZINC		Manual	Ready to use			25 µ/coat (2 coats)	10'	30' a 20°C	5
	QUICK ZINC ALU		Manual	Ready to use			25 µ/coat (2 coats)	10'	30' a 20°C	5
	QUICK BODYPRIMER HS		Manual	Ready to use			30 µ (2 coats)	15'	2H a 20°C	6
FILLERS	HS FILLER 540		Spray gun (Nozzle 1.6- 2.0 mm)	4:1	0-20%	90'	60-180 µ (1-3 coats)	20/40' a 60°C	20/40' a 60°C	7
	EASY FILLER 4000		Spray gun (Nozzle 1.6- 2.0 mm)	5:1	0-20%	30'	65-190 µ (1-3 coats)	120' a 20°C 20/30' 60°C	120' a 20°C 20/30' 60°C	8
	QUICK 1K EASY FILLER		Manual	Ready to use			70-80 µ/coat (1-3 coats)	60' a 20°C	60' a 20°C	9

**QUICK ZINC**

Semi-glossy, epoxy-based zinc spray to be used on metals.

Specially indicated as a current conductor.

High zinc content (90,5 % once dry).

Excellent anti-corrosive properties. Very fast drying, good adhesion and high gloss durability.

REFERENCE	COLOUR	CAPACITY	BOX
5011-001073	SILVER	400 ML	12 UN

**QUICK ZINC ALU**

Silver-coloured, satin paint that provides great anti-corrosive protection for metals, thanks to its high pure zinc VOC content and its aluminium pigments.

Excellent anti-corrosive properties. Very fast drying, good adhesion and high gloss durability.

REFERENCE	COLOUR	CAPACITY	BOX
5011-001075	SILVER	400 ML	12 UN

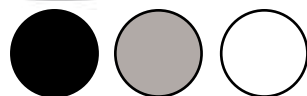

QUICK BODYPRIMER HS

HS flexible spray primer for use on metal, wood and plastics. Excellent filling properties, can also be used as an adhesive base. Made of modified nitro synthetic resins for excellent recoatability

Ideal for repairing small surfaces without sanding.

REFERENCE	COLOUR	CAPACITY	BOX
5011-001057	MEDIUM GREY	500 ML	12 UN

FILLER AND SURFACER HS 540

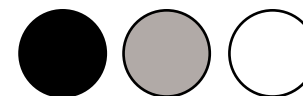

HS Filler 540 due to its high solids content has a very high filling power.

High spreading and application rate of 1-3 coats ensures good surface coverage and does not cause polishing difficulties.

The use of a 1.5-2.5 mm nozzle helps to avoid droplets.

Its use ensures high finishing safety even when applying thick coats, excellent corrosion protection and optimum adhesion.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001146	WHITE FILLER	3.6 L	4 UN
5009-001147	GREY FILLER	3.6 L	4 UN
5009-001150	BLACK FILLER	3.6 L	4 UN

5009-001159	STANDARD HARDENER	900 ML	4 UN

FILLER AND SURFACER HS 540 1L + HARDENER

HS Filler 540 due to its high solids content has a very high filling power.

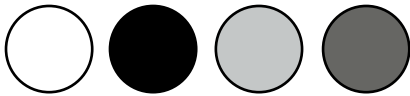

High spreading and application rate of 1-3 coats ensures good surface coverage and does not cause polishing difficulties.

The use of a 1.5-2.5 mm nozzle helps to avoid droplets.

Its use ensures high finishing safety even when applying thick coats, excellent corrosion protection and optimum adhesion.

5009-001161	BLACK	1 L + 250 ML	6 UN
5009-001163	WHITE	1 L + 250 ML	6 UN

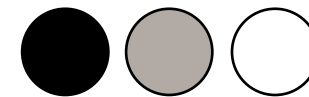

EASY FILLER 4000

Grey two-component polyurethane filler with a VOC content of less than 540 g/l, the limit established by European regulations for its category.

It can be applied on old paint or any other type of surface, including galvanised sheet metal or aluminium.

Mixed in a 5:1 ratio with the easy filler catalysts (standard or extra fast).

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001218	WHITE FILLER	4 L	4 UN
5009-001219	BLACK FILLER	4 L	4 UN

5009-001223	EXTRA FAST HARDENER	800 ML	6 UN

QUICK 1K EASY FILLER

The 1K Easy Filler is a 1K acrylic filler with the best filling capacity and coverage possible.

High layer thickness only one pass.

Adheres very well to steel, aluminum, polyester filler and many plastics.

REFERENCE	COLOUR	CAPACITY	BOX
5011-001060	WHITE	400 ML	6 UN
5011-001061	GREY	400 ML	6 UN

The background image shows a close-up of a car's body panel, likely a fender or door, which is partially covered with a light-colored, wrinkled protective paper. A yellow spray gun is positioned on the right side, spraying a clear coat onto the surface. The lower portion of the image is overlaid with a solid blue gradient. The text "CLEAR COAT REPAIR" is written in a large, white, bold, italicized sans-serif font across the middle of this blue area.

STAR LACK CLEAR COAT UHS 4000

It's a UHS (ultra high solid) two-component acrylic clearcoat 420, for the car refinish sector. Easy application and fast drying. Suitable for processes requiring a high quality finish with high gloss and resistance. Particularly recommended for two-coat waterborne cycles, due to its minimal absorption.

Excellent finish, deep gloss and very clear appearance. Thanks to its versatility and its different catalysts, it can be used in any refinish.

STAR LACK CLEAR COAT HS 4050 PLUS AND HARDENER HS

It's a two-component high solid acrylic lacquer with scratch resistant properties. It is characterised by a long service life and easy application without additional thinner. The resulting coating is smooth, distinguished by its high gloss and very good chemical, mechanical and weather resistance as well as UV resistance. The anti-scratch clear coat HS / P is designed for water- and solvent-based basecoats.

Mixing proportion 2:1. There is a large range of compatible hardeners for this product.

REFERENCE	DESCRIPTION	CAPACITY	BOX

KIT STAR LACK 4050 PLUS + HARDENER STANDARD

HS Clear Coat Kit with anti-scratch properties. Fast air drying. Allows a very productive finish. Easy to apply. No thinner required. Currently available with standard catalyst.

Fast drying. Produces a highly effective finish. Does not require thinner.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001010	CLEAR COAT HS + HARDENER STANDARD	1 L + 500 ML	12 UN

STAR LACK AIR DRY

Fast-drying acrylic coating, without the need for forced heat. Ideal to save costs added to the repair and reduce repair times. Recommended use in partial or general repairs at ambient temperatures between 15 and 28 °C. Resistant to UV rays, chemical agents as well as scratching. The turnaround time of a vehicle in service is only 90 minutes from the application of the clearcoat.

2:1 mixing ratio.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001101	CLEAR COAT	5 L	4 UN
5009-001102	HARDENER	2,5 L	4 UN

STAR LACK EXPRESS

Last generation clear coat with air drying technology, with no need to use heat drying systems although the products allows it perfectly. Especially developed for all kind of painting works, including flat parts such as roofs, hoods, complete sides, etc. Allows to paint one part after another thanks to its spraying acceptance time of a standard clear coat. The use of this product allows a significant saving in energy costs due to the external heat.

1:1 mixing ratio.

5009-001165	HARDENER	1 L	4 UN

KIT STARMATE 2:1 Y HARDENER

The Kit Starmate 2: 1 of last generation acrylic bicomponent and of transparent matte finish, designed for the finishing of automobiles. It is characterized by high chemical and mechanical resistance to weathering, as well as high hardness and resistance to scratches and UV rays.

Designed for use on solvent- and waterborne base coats.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001308	KIT STARMATE (10)	1 L + 500 ML	12 UN
5009-001310	KIT STARMATE (30)	1 L + 500 ML	12 UN

HEADLIGHTS KIT

Kit including a high resistant clear coat with its hardener and an additive especially suitable for UV light-protection. This additive protects the polycarbonate panels after repair.

The Headlight Restoration Kit has excellent strength and adhesion on plastics and polycarbonates as well as resistance to micro-impacts from gravel and insects. Allows the repair of badly damaged optics after a suitable sanding and restoration process.

5006-001104	ACTIVATOR	125 ML	1 UN

STARLIGHT

Two-component polyester with anti-scratch effect to protect polycarbonate surfaces. Creates a shield over the windscreen. Protects from gravel and insects. Guarantees clear visibility.

It can be dried at room temperature or cooker dried. Use whenever high mechanical and chemical resistance is required.

Extra-fast hardener.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001001	CLEAR COAT	1 L	1 UN
5009-001002	HARDENER	500 ML	1 UN

QUICK CLEAR LACQUER

Monocomponent acrylic clear coat spray with a new formula last generation product. General use for two layers based-water or solvent paints process. High quality resin that guarantees a high level repair.

Gloss, satin or matt finish.

REFERENCE	COLOUR	CAPACITY	BOX

ACCELERATOR

ACCELERATOR FOR ACRYLICS

Accelerating additive for paints, fillers and primers.
Reduces drying time.

Reduces the drying time of acrylic coatings and fillers by
at least 15 %.

It can be used with standard and slow catalysts. The use of
fast and very fast catalysts does not speed up the drying
time.

REFERENCE	COLOUR	CAPACITY	BOX
5009-001155	COLOURLESS	1000 ML	12 UN

THINNER UNIVERSAL

Acrylic thinner for acrylic paints, varnishes and acrylic fillers, specifically for use in single and two-coat acrylic paints and enamels. Medium-slow evaporation, suitable for primers, varnishes, acrylic paints and enamels.

Suitable for CRS line chemicals.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5009-001018	SLOW	1 L	12 UN
5009-001016	SLOW	5 L	4 UN

5009-001023	STANDARD	25 L	1 UN

IONISER WB

Thinner for water-based paint. It is a solution ionised with magnetic charges so that when in contact with paint, positive charges are transferred to the mixture, obtaining a higher paint transfer to the surface being painted.

Considerably reduces drying time and prevents stains and streaks from appearing.

Compatible with all water-based systems that admit thinning.

REFERENCE	COLOUR	CAPACITY	BOX
5009-001190	COLOURLESS	1 L	14 UN
5009-001189	COLOURLESS	5 L	4 UN

QUICK SPOTBLENDER

Mixture of high-quality thinners to be used for paint blending during rePairs. Fine mist spray.

To be used with an application gun or directly with the spray.

REFERENCE	DESCRIPTION	CAPACITY	BOX
5011-001155	SPRAY	400 ML	6 UN
5011-001156	BOTTLE	1000 ML	12 UN

DEGREASER

Cleaner for use on surfaces to be repainted. Suitable for the first degreasing step to remove tar, grease and silicone residues from vehicles to be repainted. The product can also be used for the initial degreasing of composite plastics. It can be used for degreasing untreated metal surfaces as well as original OEM finishes to be repaired.

This degreaser has a high drag-out power and a slow evaporation without leaving traces.

COMPOUNDING REPAIR

Compounding Repair offers you a wide range of products for polishing, shining and protection of the vehicle. Among them, you can find berets, sponges, cloths, plates, polishers and protectors.

SMART PROGRESSIVE
ABRASION PLUS

SPA PLUS (Smart Progressive Abrasion Plus). It is a working philosophy for development in the process of defect rectification in refinishing, marking the beginning of a new era of innovation, flexibility and versatility.

The simple handling and easy application of these polishing products will facilitate greater efficiency and time savings in the body shop, thus offering a wide range of alternatives for multiple polishing processes and needs.

Due to the formulation and development of the SPA (Smart Progressive Abrasion) system, we avoid the chemical filling of abrasive defects in paint refinishing, which traditionally reappear in the form of shading or visual marks, achieving incredible and long-lasting results in car refinishing.

ADVANTAGES

1 - PLUS: These polishes are developed with a technology of spherical abrasive micro particles of different sizes of fast cutting which intervene in the polishing process, causing a progressive cutting action.

2 - PLUS: It is no longer necessary to have different polishes for the same polishing process. This avoids complex processes that lead to application errors and unsatisfactory results.

3 - PLUS: With the SPA PLUS system, we achieve savings and efficiency in the workshop when looking for processes focused on profitability.

4 - PLUS: These polishes are specially indicated for varnishes and finishes of the latest generation, including fast drying or air drying systems. We can also achieve a higher resolution and quality in complex colours.

ONIX PLUS

ONIX PLUS is an emulsion polish with micro abrasive particles with maximum cutting power and gloss especially suitable for paint finishing work on freshly painted and cured, deep scratch resistant surfaces. Maximum cutting power and gloss.

- Smart Progressive Abrasion Technology (SPA) Plus.
- No drying out of the polishing paste.
- Low temperature emission.
- The paste is free of waxes, silicones and unpleasant odours.

Its composition allows a great cutting power and speed. Easily removes sanding marks from P1000 and above.

SMART PROGRESSIVE
ABRASION PLUS

CRYSTAL PLUS

Micro fine finishing polish based on highly refined aluminium oxide.

Thanks to SPA (Smart Progressive Abrasion) technology, Crystal Plus efficiently removes micro fine scratches, swirl marks and holograms on dark car paints.

The simple handling and easy application of Crystal Plus will provide increased efficiency and time savings in the bodyshop.

NANO FLASH PROTECT

A liquid compound for protection and finish. This incredible product provides a quick layer of protection to any surface of the vehicle thanks to its nanoparticles that repel water, dust and environmental pollutants, which promote longer life on the treated surface. Its formulation contains nano-particles that repel water, dust and environmental pollutants and protect the treated surface.

BACKING PLATE 6" POLISHER BPC 7121

The Foam Plate 6" 150mm, for polisher SPC/BPC 7121 is especially important for the broken orbital system. It is constructed of polyurethane foam with a very good mechanical strength to withstand lateral and rotational movements.

This plate in conjunction with our CRS conical polishing sponges preforms a gentle and comfortable polishing. The holes in the plate allow to keep the working area clean while promoting better cooling.

The plate is perfectly designed to obtain a perfect anchorage between the sponge and its base.

WHEEL COVER–PLASTIC

Disposable wheel cover made of transparent plastic.

TYRE COVERS FOR WHEEL RIM PAINTING

An electrostatic masking/protection film to make the wheel rim paintwork clean while protecting the tyre.

Keeps all excess paint off the tyre, infrared resistant and slightly transparent.

This solution allows you to isolate the tyre without having to dismount it in a single action. All you have to do is deflate the tyre slightly, fit the edge of the inner hole of the cover and pull until it fits over the entire rim. No need to use insulating tape or paper, reducing operation time between 15 to 20 minutes, thanks to the elasticity of the polyethylene compound.

Fits any type of rim, including truck and bus rims.

MASKING TAPE 8010

Professional Masking Tape for cars with a crepe paper backing and solvent-based adhesive, designed for any type of paintwork and applications with high temperature drying cycles, up to 80°C for 60 min. Our 8010 Masking Tape is highly adaptable to uneven surfaces and guarantees smooth edges. It works with tape overlay, with paper and masking film with good holding power. Easy and clean removal, without leaving glue residues on the application surface.

GREEN PREMIUM TAPE

Bodybuilder tape for the most demanding masks. Especially indicated for humid environments as well as direct contact with water-based paints.

- Adhesion: 4.8 N / 25 mm.
- Total thickness: 0.13 mm.
- Temperature resistance: 90 °C – 30 min.

REFERENCE	SIZE	BOX
2002-009018	18 MM X 50 M	48 UN
2002-009024	24 MM X 50 M	36 UN
2002-009036	36 MM X 50 M	24 UN

DOUBLE-SIDED ACRYLIC TAPE

Double-sided adhesive tape recommended for fixing moulds, emblems and accessories. Resists high temperatures. Strong adhesion on metal, glass and most plastics.

REFERENCE	SIZE	BOX
2002-005006	9 MM X 10 M	10 UN
2002-005007	12 MM X 10 M	10 UN
2002-005008	19 MM X 10 M	10 UN

DOUBLE-SIDED TRANSPARENT ACRYLIC TAPE

Double Sided Transparent Acrylic Tape is especially designed for permanent bonding in interior and exterior applications. This can replace riveting, welding, liquid glues and other permanent fasteners. It is also suitable for various kinds of substances, such as metal, wood, glass and many plastics.

It has a total thickness of 1MM resistant to temperatures between -40 °C and 120 °C.

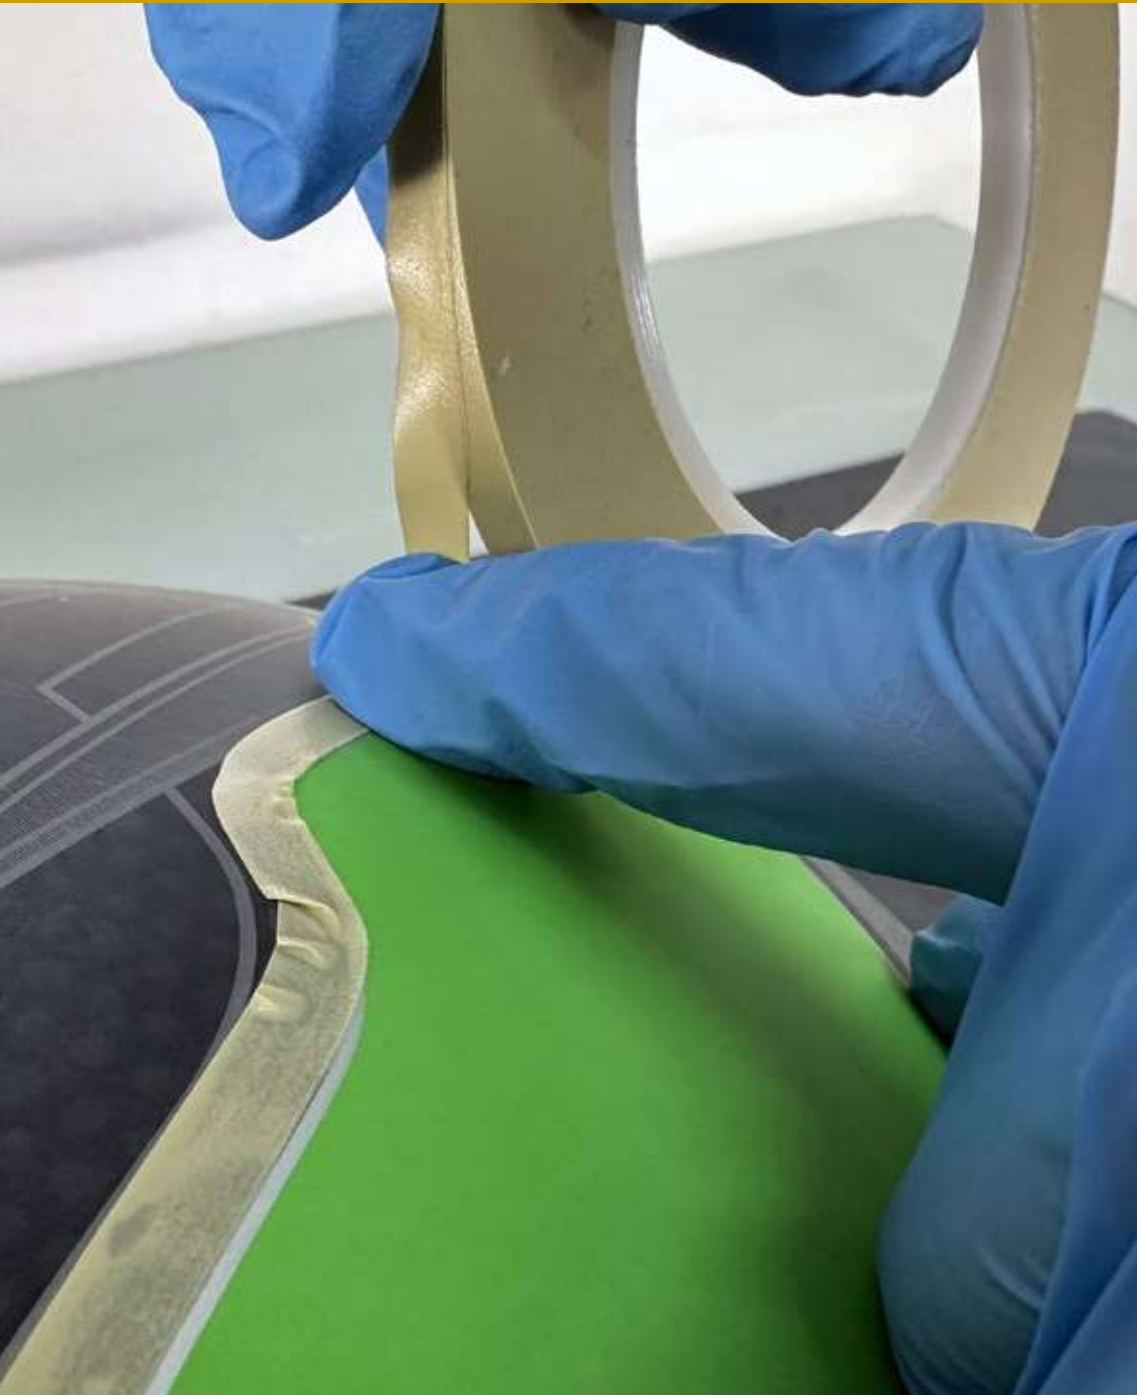

REFERENCE	SIZE	BOX
2002-005000	19 MM X 10 M	10 UN

DOUBLE-SIDED TAPE

Double-sided adhesive tape recommended for fixing moulds, emblems and accessories.

REFERENCE	SIZE	BOX
2002-001780	6 MM X 10 M	10 UN
2002-000910	9 MM X 10 M	10 UN

2002-011926	25 MM X 66 M	10 UN

PRE-CUT LIFTING TAPE

Plastic strip on auto-adhesive tape for masking new windcreens and windowpanes.

Pre-cut and very flexible for easy masking of curves.

REFERENCE	SIZE	BOX
2002-003071	10 MM X 10 M	12 UN
2002-003072	15 MM X 10 M	12 UN
2001-001570	20 MM X 10 M	12 UN

BROWN LIFTING TAPE

Tape removes high quality rubber for the masking of rubber from the body of the car, easily separating the rubber from the surface to be painted to achieve a clean and original factory spraying, without generating paint rims between joints of rubber and bodywork.

REFERENCE	SIZE	BOX
2002-004071	10 MM X 10 M	12 UN
2002-004072	15 MM X 10 M	12 UN
2002-004073	20 MM X 10 M	12 UN

LOGO TAPE

Adhesive strips for recovering logos and emblems.

By placing the logo removed prior to repair on the adhesive surface of Logo Tape, the adhesive bonds to the old contact surface, allowing it to adhere again.

REFERENCE	SIZE	BOX
2002-001980	50 MM X 300 MM	10 UN

ALU TAPE

Silver, woven tape, covered by a protective film with strong adhesion power.

Waterproof and abrasive-resistant.

REFERENCE	SIZE	BOX
2002-001990	50 MM X 50 M	18 UN

FLEXTAPE

Masking tape. Facilitates, improves, and increases the possibilities of masking in the repainting of areas with geometric difficulty in the bodywork. It allows multiple advantages like cutting longitudinally and vertically.

It also stands out, its special adhesive of great resistance that leaves no remains in combination with a rigid part.

REFERENCE	SIZE	BOX
2002-000001	75 MM X 20 M	12 UN

TEXTURED ADHESIVE PLASTIC

Auto-adhesive tape with a textured finish touch that imitates original finish on door frames of certain car models.

Easy to lay.

REFERENCE	SIZE	BOX
2001-001585	150 MM X 5 M	12 UN

PARKING SENSOR PROTECTOR

Adhesive product specially indicated to protect the parking sensors during the process of painting works.

Makes the work of the operator easier by saving time and retouching operations.

CERAMIC LINE DISC

Multi-hole ceramic abrasive discs on high quality plastic backing. Due to its ceramic composition, it is extremely resistant, which means a long service life of the abrasive. The contribution of aluminium oxide allows, due to its crystalline composition, to maintain a sharp, precise and homogeneous sanding. Applicable to any type of surface.

Due to their properties and technical characteristics, they are especially recommended for use on surfaces that are harder and more resistant to sanding, such as ceramic varnishes, cataphoresis, epoxy resins, etc.

F1 BLUE LINE DISC 150 MM

15-hole abrasive disc on a high quality, high performance flexible plastic backing. Among the main qualities of this backing is the better evacuation of the heat generated during the sanding friction and the higher cutting speed thanks to the rigidity of the film. All this increases the performance of this disc compared to conventional paper. Velcro system.

Diameter: 150 mm. Discs available in boxes of 100 units, except P60 grit which comes in 50 units. Sales units: 6 boxes.

SUNDUST

Adhesive discs and films with high abrasive power on a flexible base that allows a homogeneous sanding on any paint surface. Due to its structural and flexible composition, it is perfectly suited to adapt to all geometrical shapes of the bodywork, obtaining a reliable preparation for the coating of metallic and complex colours. High abrasive power.

- Low dust emission.
- Reduced clogging.
- Precise and homogeneous sanding.
- Long abrasive life.

STARDUST

Discs and films on a flexible dry abrasive base. It allows us to carry out a preparatory work prior to polishing, rectifying marks of abrasives with higher grains and obtaining an optimum preparation for the rectification of imperfections in the repainting. Dry sanding allows us to have references of the imperfections to be corrected at all times.

- Good cutting and shading power.
- Ideal preparation prior to polishing.
- Polishing time is greatly reduced.

ELECTRIC POLISHER SPC 7102

Rotative polisher for professional use for works of polishing and buering in body workshops, washing and polishing, industry, etc. Ergonomic design and light weight. Includes a plate and a travel bag. Valid for SPC 7102 – SPC 7121.

- Voltage: 220/240.
- Power: 1150 W.
- Frequency: 50 Hz.
- Speed: 1000-3500 -r.p.m.
- Weight: 2.2 KG.
- Axis: M14.
- Lenght: 6 m.
- Accessories: Sided handle.

REFERENCE	BOX
1014-005002	1 UN

ELECTRIC ROTATING ORBITAL POLISHER SPC 7121

Random orbital polisher for professional use with 150 mm plate and 21 mm orbit. Low vibrations technology that reduces the physical work of the operator. Ideal for polishing works that require an important roughing and for buering process to avoid holograms. Includes a plate and a travel bag. Valid for SPC 7102 – SPC 7121.

- Voltage: 220/240.
- Power: 1150 W.
- Speed: 1000-3500 -r.p.m.
- Weight: 2.5 KG.
- Orbit: 21 mm.
- Accessories: Sided handle, plate 150 mm

REFERENCE	BOX
1014-005006	1 UN

ELECTRIC ROTARY POLISHER EPR 8194

The EPR 8194 electric polisher is specially built for demanding professional automotive polishing jobs.

It has a motor stabilizer to provide a smooth and constant rotation. In addition, it incorporates a locking system for easy change of the back plate.

- Backing plate: 6".
- Input power: 1050W-1500W.
- Foam pad: 7".
- Speed: 700-2500/min.
- Gear system: Double reduction.
- Weight: 2.2 KG.
- Axis: M14.
- Accessories: 6" back plate, fixed spanner, spare carbon brush, side handle.

REFERENCE	BOX
1014-005050	1 UN

ELECTRIC ROTARY POLISHER EPRO 8121

The EPRO 8121 is a roto-orbital electric polisher, designed for precise, comfortable and demanding polishing. Especially suitable for precision work, dark colours and removing optical marks and holograms.

It is equipped with a multi-hole plate to keep the temperature of the foam pad low and, thus, reduce expansion in the polishing area and prevent further wear of the pad.

EPRO 8121 is equipped with a carbon brush motor and a speed stabiliser, which provides a constant speed output.

- Backing plate: 6".
- Input power: 500W-750W.
- Foam pad: 7".
- Speed: 2500-4500/min.
- Gear system: Double reduction.
- Weight: 2.6 KG.
- Axis: M8.
- Orbit: 21 mm.
- Accessories: Fixed spanner, spare carbon brush, side handle, foam pad 7" x 2.

REFERENCE	BOX
1014-005080	1 UN

POLISHER BPC 7121

The polisher BPC 7121 is a cordless machine, it is designed and built for Lithium battery, professionally manufactured. 5.0 Ah battery not included.

- Voltage: 18 VDC.
- Backing plate: 3" / 5" / 6".
- Foam pad: 4" / 6" / 7".
- Unloaded speed: 2000-5000 OPM.
- Weight: 1,83-2,14 KG.
- Orbit: 12 mm/ 15mm / 21 mm.
- Recommended temperature: +4 °C a +40 °C.
- Accessories: Back plate.

REFERENCE	BOX
1014-006021	1 UN

POLISHER BPC 7102

The BPC 7102 rotary cordless polisher is professionally designed and manufactured for polishing work in the automotive and industrial sectors. 5.0 Ah battery not included

- Voltage: 18 VDC.
- Backing plate: 5" / 6".
- Foam pad: 6" / 7".
- Unloaded speed: 700-1500 OPM.
- Weight: 1,70-1,73 KG.
- Gear system: Double reduction.
- Axis: M14.
- Recommended temperature: +4 °C a +40 °C.
- Accessories: 5" back plate, side handle.

REFERENCE	BOX
1014-006040	1 UN

POLISHER BPC 6012

The BPC 6012 polisher is a lightweight, ergonomic and easy to handle battery-powered rotatory polisher. Its design allows it to work comfortably in all areas of the vehicle with less operator fatigue and saturation. Particularly effective due to its light size, especially in polishing work in limited or small areas. 2.5 Ah battery not included.

- Backing plate: Max. 123 mm (5").
- Foam pad: Max. 150 mm (6").
- Weight: 1,60 KG.
- Unloaded speed: 500-1800 OPM.
- Tension: 18VDC.
- Axis: M14.
- Accessories: 5" back plate, side handle.

PLATE AND INTERFACE 75 MM

Hard velcro plate for mini sanding machine of 75 mm diameter.

Sponge interface to be placed between the abrasive and the plate. Enables a finer cut and therefore a better finish. For an optimum result with this interface, it is recommended to use fine grain (P220 and above).

Velcro system. Thickness: 10 mm. Thread: M8.

CONTROL DRY COAT NEW (SANDING GUIDE)

Control Dry Coat, with powder deposit of graphite separated from the applicator pad. It allows reducing the size of the applicator device by not having the graphite deposit inside it.

More agile and practical.

REFERENCE	BOX
2004-000012	1 UN

QUICK SANDING CONTROL

Easy sanding acrylic paint for the preparation of surfaces, where the location and correction of unevenness and imperfections is required, in order to obtain a smooth and flawless finish.

- Quick drying.
- Contains no lead or other heavy metals.
- Easy sanding.
- Good adhesion.
- Excellent hiding power.
- Ease of application and recoating.

ELECTRIC VACUUM CLEANER CRS E38

The CRS E38 professional electric vacuum cleaner is an L-class vacuum cleaner with a high motor and turbine suction performance what provides a 210mbar suction with an air flow of 3900 l / min. The autostart function extends the life of the engine and reduces the noise. Manual filter cleaning function.

It has a high protection for the user and allows a good maneuverability for the operator in the workshop thanks to its ergonomics, its large rear wheels and the cable length of 5 meters. The surface of the vacuum cleaner allows to place tool boxes or accessory shelf for the placement of abrasives and power tools.

OPTIMUM LIGHT PLUS COLOUR

Portable lamp for colour evaluation and coverage control in refinishing processes. It has a lithium battery with charge indicator. It allows excellent colour perception thanks to its light intensity regulator. Thanks to the characteristics of its LEDs, it is ideal for preparation, painting, polishing or cleaning of vehicles.

Optimum Light Plus Colour features three colour temperature and UV options, quickly switching from warm light to cool white ultra-high quality colour matching. It is highly impact resistant, IP65 waterproof and dustproof, and has an easily removable and cleanable lens. 360 degree folding swivel hook and 180 degree folding magnetic base.

INFRARED CRS–1C

This infrared system (CRS-1C) is suitable for drying two-component products used in bodywork repair.

Its main characteristics are deep reach, reduced drying time, low power consumption, maximum adaptability and use efficiency. Highly flexible and easy to move.

The CRS-1C lamp is equipped with a timer that determines both drying level and time. The equipment distance and height can be easily adjusted.

Height is comprised between 20 cm and 160 cm.

- Input power: 4,6 A.
- Voltage: 220-240 V / 50 HZ.
- Short-wave infrared quartz halogen emitter : 1 x 1050 W.
- Maximum power: 1100 W.
- Time ranges: 2 x 35 min.
- Drying surface: 0.6 x 0.4 m.
- Drying temperature: 60°C – 70°C

REFERENCE	DESCRIPTION	BOX

INFRARED CRS-3C WITH DISTANCE SENSOR

This short-wave infrared system (CRS-3C) is suitable for drying two-component products used in bodywork repair. Its main characteristics are deep reach, reduced drying time, low power consumption, maximum adaptability and use efficiency. Highly flexible and easy to move. Equipped with distance sensor.

The CRS-3C lamp is equipped with a timer that determines both drying level and time. The equipment distance and height can be easily adjusted. Heights: 40 and 200 cm. Comes with 4 digital memories that store drying time for each product.

- Input power: 13.7 A.
- Voltage: 220-240 V / 50 HZ.
- Short-wave infrared quartz halogen emitter : 3 × 1050 W.
- Maximum power: 3200 W.
- Time ranges: 2 x 35 min.
- Drying surface: 1.0 x 0.8 m.
- Drying temperature: 60°C – 70°C

REFERENCE	DESCRIPTION	BOX

INFRARED CRS-4C WITH DISTANCE SENSOR

The short wave infrared model CRS -4C is suitable for drying bi-component products used in body repair. This infrared has maximum flexibility and great ease of movement. The height of the lamp: from 40 cm to 200 cm. Maximum adaptability and cost-effectiveness of use.

The body of each of the screens can be tilted to different angles.

4 separately controllable spotlights can dry one or more at the same time.

- Input power: 18.3 A.
- Voltage: 220-240 V / 60 HZ.
- Short-wave infrared quartz halogen emitter : 4 x 1050 W.
- Maximum power: 4200 W.
- Time ranges: 15 x 30 min.
- Drying surface: 1.35 x 0.8 m.
- Drying temperature: 60°C – 100°C

BODYSHOP EQUIPMENT

With *Bodyshop Equipment* we aim to optimise the organisation of the workshop by providing the operator with all the products and equipment necessary to optimise his work in his workplace, such as supports, trolleys, dispensers and much more.

MASKING PAPER DISPENSER DELUXE

It has 5 supports for rolls between 120 cm and 30 cm. Each dispenser contains a micro-toothed cutting saw and a paper holding spring, for optimal use of the product.

The Deluxe masking paper cart is equipped with large wheels that facilitate, together with its attachment, an easy movement for the operator.

Dimensions: 158 cm x 133 cm x 49 cm.

REFERENCE	BOX
2004-000020	1 UN

FILM DISPENSER TROLLEY

Mobile dispenser for film reels. Easy and comfortable to transport.

High resistance.

REFERENCE	BOX
