Full text of hazard statements mentioned is indicated in section 16.

Note: When in section 3 a range of percentages is used, the health and environmental hazards describe the effects of the highest concentration of each component, but below the maximum value. LABEL ELEMENTS:

This product is labelled with the signal word DANGER in accordance with Regulation (EU) No. 1272/2008~2021/849 (CLP)

- Hazard statem	ients:
H225	Highly flammable liquid and vapour.
H315	Causes skin irritation.
H318	Causes serious eye damage.
- Precautionary	statements:
P102	Keep out of reach of children.
P103	Read label before use.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P233	Keep container tightly closed.
P240	Ground and bond container and receiving equipment.
P310	Immediately call a POISON CENTER or doctor.
P321	Specific treatment (see on this label).
P403+P235	Store in a well-ventilated place. Keep cool.
P501	Dispose of contents/container to hazardous or special waste collection point.

SECTION 4: FIRST AID MEASURES

Version: 1

4.1 DESCRIPTION OF FIRST AID MEASURES:

Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first aid.

	Douto of overcouro		
	Route of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures
	Inhalation:	Inhalation of solvent vapours may produce headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.	Remove the patient out of the contaminated area into t fresh air.If breathing is irregular or stops, administer artificial respiration.If the person is unconscious, place appropriate recovery position.Keep the patient warm an at rest until medical attention arrives.
	Skin:	Skin contact causes redness and pain.Prolonged contact may cause skin dryness.	Remove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or lukewarm water and a solution of 5% sodium bicarbonate.Finally, rewash the affected area with soap and water.Do not use solvents or thinners.
	Eyes:	Contact with the eyes produces redness, pain and serious burns.	Remove contact lenses.Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 1 minutes, holding the eyelids apart, until the irritation is reduced.Call a physician immediately.
	Ingestion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.	If swallowed, seek medical advice immediately and sh container or label. Due to its acid condition, the effects can be reduced to a minimum by drinking plenty of water, to which milk of magnesia has been added. Do not induce vomiting, due to the risk of aspiration.Keep the patient at rest.
		PTOMS AND EFFECTS, BOTH ACUTE AND DE	LAYED:

STRIPPING GEL REPAIR Code: 5015-000001 SYSTEN Version: 1 Date of issue: 13/06/2023 SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION CONTROL PARAMETERS If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances. OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL) Not established - BIOLOGICAL LIMIT VALUES: Not established - DERIVED NO-EFFECT LEVEL (DNEL): Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH. DNEL Inhalation DNEL Cutaneous mg/kg bw/d - DERIVED NO-EFFECT LEVEL, WORKERS:-Systemic effects, acute and chronic: Glycolic acid 9,2 (a) 10,56 (c) - (a) 57,69 (c) 450 (a) 90 (c) 47 (a) 9,5 (c) Benzyl alcohol - DERIVED NO-EFFECT LEVEL, WORKERS:- Local DNEL Inhalation **DNEL** Cutaneous effects, acute and chronic: 9.2 (a) 1,53 (c) - (a) - (c) Glycolic acid - (a) - (c) - (a) - (c) Benzyl alcohol Derived no-effect level, general population: Not applicable (product for professional or industrial use). (a) - Acute, short-term exposure, (c) - Chronic, long-term or repeated exposure. (-) - DNEL not available (without data of registration REACH). - PREDICTED NO-EFFECT CONCENTRATION (PNEC): - PREDICTED NO-EFFECT CONCENTRATION, PNEC Fresh water PNEC Marine AQUATIC ORGANISMS:- Fresh water, marine mg/l mg/l water and intermittent release: 0.0312 0.0031 Glycolic acid 0.1 Benzyl alcohol 1 - WASTEWATER TREATMENT PLANTS (STP) PNEC STP **PNEC Sediments** AND SEDIMENTS IN FRESH- AND MARINE mg/kg dw/d mg/l WATER: 7 0.115 Glycolic acid 39 5.27 Benzyl alcohol PNEC Soil - PREDICTED NO-EFFECT CONCENTRATION, PNEC Air TERRESTRIAL ORGANISMS:- Air, soil and mg/m3 mg/kg dw/d effects for predators and humans: 0.007 Glycolic acid Benzvl alcohol 0.456 (-) - PNEC not available (without data of registration REACH). n/b - PNEC not derived (not bioaccumulative potential). XPOSURE CONTROLS: 8.2 ENGINEERING MEASURES Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. - Protection of respiratory system: Avoid the inhalation of vapours. - Protection of eyes and face: Install water taps, sources or evewash bottles with clean water close to the working area. - Protection of hands and skin: It is recommended to install water taps or sources with clean water close to the working area. Barrier creams may help to protect the exposed areas of the skin.Barrier creams should not be applied once exposure has occurred. OCCUPATIONAL EXPOSURE CONTROLS: REGULATION (EU) NO. 2016/425: As a general measure on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE). with the corresponding marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, CEN norm, etc..), you should consult the informative brochures provided by the manufacturers of PPE.

SAFETY DATA SHEET (REACH)

Mask: Mask for gases and vapours of organic compounds (EN14387).Class 1: low capacity up to 1000 ppr. Class 2: medium capacity up to 5000 ppm, Class 3: high capacity up to 10000 ppm. In order to obtain suitable protection level, the filter class must be selected depending on the type and concentration of the contaminating agents present, in accordance with the specifications supplied by the filter producers. The respiratory equipment with filters does not work satisfactorily when the air contains the concentrations of vapour, use independent breathing apparatus. Safety goggles: Safety aggles designed to protect against liquid splashes, with suitable lateral protection text is the specifications supplied by the filter contains the manufacturer. Percenter, gloves of protection level 5 or higher should be used, with a breakthrough time of >240 min. When short contact with the product is expected, use gloves with a protection level 2 or higher should be used, with a breakthrough time >30 min. The breakthrough time of the selected glove material should be in accordance with the pretended period of use. There are several factors (for example, temperature), they do in practice the period of use of a protective gloves resistant against chemicals is clearly lower than the established standard EN374. Due to the wide variety of circumstances and possibilities, the instructions/specifications provided by the glove supplier should taken into account. Use the proper technique of removing gloves (without touching glove's outer surface) to avoid contact of the product with the skin. The gloves should be immediately replaced wh any sign of degradation is noted. Boots: No. Apron: No. Clothing: Advisable. Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Respiratory corrosion/irritation: Not classified 	-	-	Not classified as a product corrosive or irritant by inhalation (based on available data, the classification criteria are not met).	GHS/CL 1.2.6. 3.8.3.4.
- Skin corrosion/irritation:	Skin 🕕	Cat.2	IRRITANT: Causes skin irritation.	GHS/CL 3.2.3.3.
- Serious eye damage/irritation:	Eyes 💿	Cat.1	DAMAGE: Causes serious eye damage.	GHS/CL 3.3.3.3.
 Respiratory sensitisation: Not classified 	-	-	1 3 3	GHS/CL 3.4.3.3.
- Skin sensitisation: Not classified	-	-	Not classified as a product sensitising by skin contact (based on available data, the classification criteria are not met).	GHS/CL 3.4.3.3.

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

Danger class	Target organs	Cat.	Main effects, acute and/or delayed	Criteria
 Aspiration hazard: Not classified 	-	-	Not classified as a product hazardous by aspiration (based on available data, the classification criteria are not met).	GHS/CLP 3.10.3.3.

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

<u>SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):</u> Not classified as a dangerous product for target organs.

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

It is not considered as a mutagenic product.

- Toxicity for reproduction:

Does not harm fertility.Does not harm the unborn child.

- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:

Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

- Short-term exposure:

Exposure to solvent vapour concentrations in excess of the stated occupational exposure limit, may result in adverse health effects, such as mucous membrane and respiratory system irritation and adverse effects on kidneys, liver and central nervous system.Liquid splashes in the eyes may cause irritation and reversible damage.If swallowed, may cause irritation of the throat; other effects may be the same as described in the exposure to vapours. Causes skin irritation. Causes serious eye damage. May cause drowsiness or dizziness.

- Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

INTERACTIVE EFFECTS:

Not available.

INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION:

 <u>Dermal absorption:</u> Not available.
 <u>Basic toxicokinetics:</u> Not available.

SECTION 15: REGULATORY INFORMATION SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC FOR THE SUBSTANCE OR MIXTURE 15.1 The regulations applicable to this product generally are listed throughout this Safety Data Sheet. Restrictions on manufacture, placing on market and use: See section 1.2 Tactile warning of danger: Not applicable (product for professional or industrial use). Child safety protection: Not applicable (the classification criteria are not met). Specific legislation on detergents: It is applicable the Regulation (EC) No. 648/2004~907/2006 on detergents. **BENZYL ALCOHOL** OTHER REGULATIONS: It is applicable the Recommendation 89/542/EEC, for the labelling of detergents and cleaning products. Control of the risks inherent in major accidents (Seveso III): See section 7.2 Other local legislations: The receiver should verify the possible existence of local regulations applicable to the chemical CHEMICAL SAFETY ASSESSMENT: 15.2 A chemical safety assessment has not been carried out for this mixture. SECTION 16 : OTHER INFORMATION TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3: 16.1 Hazard statements according the Regulation (EU) No. 1272/2008~2021/849 (CLP), Annex III: H225 Highly flammable liquid and vapour. H302 Harmful if swallowed. H314 Causes severe skin burns and eye damage. H315 Causes skin irritation. H318 Causes serious eve damage. H319 Causes serious eve irritation. H332 Harmful if inhaled. EVALUATION OF THE INFORMATION ON THE DANGER OF MIXTURES: See sections 9.1, 11.1 and 12.1. ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS: It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to provide understanding and interpretation of Safety Data Sheets and labelling of products as well. MAIN LITERATURE REFERENCES AND SOURCES FOR DATA: · European Chemicals Agency: ECHA, http://echa.europa.eu/ · Access to European Union Law, http://eur-lex.europa.eu/ · Industrial Solvents Handbook, Ibert Mellan (Noves Data Co., 1970). · European agreement on the international carriage of dangerous goods by road, (ADR 2023) International Maritime Dangerous Goods Code IMDG including Amendment 40-20 (IMO, 2020). ABBREVIATIONS AND ACRONYMS: List of abbreviations and acronyms that can be used (but not necessarily used) in this Safety Data Sheet: · REACH: Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals. GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations. · CLP: European regularion on Classificatin, Labelling and Packaging of substances and chemical mixtures. · EINECS: European Inventory of Existing Commercial Chemical Substances. · ELINCS: European List of Notified Chemical Substances. · CAS: Chemical Abstracts Service (Division of the American Chemical Society). · UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials. SVHC: Substances of Very High Concern. · PBT: Persistent, bioaccumulable and toxic substances. · vPvB: Very persistent and very bioaccumulable substances. · VOC: Volatile Organic Compounds. · DNEL: Derived No-Effect Level (REACH). · PNEC: Predicted No-Effect Concentration (REACH). LC50: Lethal concentration, 50 percent. LD50: Lethal dose, 50 percent. UN: United Nations Organisation. · ADR: European agreement concerning the international carriage of dangeous goods by road. · RID: Regulations concerning the international transport of dangeous goods by rail. · IMDG: International Maritime code for Dangerous Goods. · IATA: International Air Transport Association. · ICAO: International Civil Aviation Organization. SAFETY DATA SHEET REGULATIONS: Safety Data Sheet in accordance with Article 31 of Regulation (EC) No. 1907/2006 (REACH) and Annex of Regulation (EU) No. 2020/878. HISTORIC: **REVISION:** Version: 1 13/06/2023 The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users" working conditionsare beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and

legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered
