SAFETY DATA SHEET (REACH)

In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2020/878

(Language:EN) QUICK TEX THICK BLACK REPAIR Code: 5004-001036 SYSTEN Previous revision: 09/08/2023 Version: 3 Revision: 09/08/2023 Date of printing: 09/08/2023 PERSISTENT, BIOACCUMULABLE AND TOXIC PBT, OR VERY PERSISTENT AND VERY BIOACCUMULABLE VPVB SUBSTANCES: Does not contain substances that fulfil the PBT/vPvB criteria. SECTION 4: FIRST AID MEASURES DESCRIPTION OF FIRST AID MEASURES: 4.1 Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure. Wear protective gloves when administering first aid Symptoms and effects, acute and delayed Description of first-aid measures Route of exposure Inhalation of solvent vapours may produce Remove the patient out of the contaminated area into the Inhalation: headache, dizziness, fatigue, muscular weakness, fresh air. If breathing is irregular or stops, administer drowsiness and, in extreme cases, artificial respiration. If the person is unconscious, place in unconsciousness.Inhalation produces irritation to appropriate recovery position.Keep the patient warm and <u>(!</u>) mucus, coughing and breathlessness at rest until medical attention arrives. Skin contact causes redness.Prolonged contact may Remove immediately contaminated clothing.Wash Skin thoroughly the affected area with plenty of cold or cause skin drvness. lukewarm water and neutral soap, or use a suitable skin (!) cleanser. Remove contact lenses.Rinse eyes copiously by Eyes: Contact with the eyes produces redness and pain. rrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is $\langle \mathbf{I} \rangle$ reduced.Call a physician immediately. Ingestion: If swallowed, may cause irritation of the throat, Do not induce vomiting, due to the risk of abdominal pain, drowsiness, nausea, vomiting and aspiration.Keep the patient at rest. diarrhoea MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED: 4.2 The main symptoms and effects are indicated in sections 4.1 and 11.1 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED: 4.3 Notes to physician: Treatment should be directed at the control of symptoms and the clinical condition of the patient.. Antidotes and contraindications: Specific antidote not known. SECTION 5: FIREFIGHTING MEASURES EXTINGUISHING MEDIA:) 5.1 Extinguishing powder or CO2 SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE: 5.2 As consequence of combustion or thermal decomposition, hazardous products may be produced: carbon monoxide, Carbon dioxide.Exposure to combustion or decomposition products may be a hazard to health. ADVICE FOR FIREFIGHTERS: 5.3 Special protective equipment: Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents. Other recommendations: Cool with water the tanks, cisterns or containers close to sources of heat or fire.Bear in mind the direction of the wind.Do not allow firefighting residue to enter drains, sewers or water courses.

QUICK TEX THICK BLACK

Code: 5004-001036

Previous revision: 09/08/2023 Version: 3 Revision: 09/08/2023 Date of printing: 09/08/2023 SECTION 6: ACCIDENTAL RELEASE MEASURES PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES: Eliminate possible sources of ignition and when appropriate, ventilate the area. Do not smoke. Avoid direct contact with this product. Avoid breathing vapours. Keep people without protection in opposition to the wind direction. ENVIRONMENTAL PRECAUTIONS Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations. METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP Contain and mop up spills with non-combustible absorbent materials (earth, sand, vermiculite, diatomaceous earth, etc..). Clean preferably with a biodegradable detergent. Keep the remains in a closed container. **REFERENCE TO OTHER SECTIONS** For contact information in case of emergency, see section 1. For information on safe handling, see section 7. For exposure controls and personal protection measures, see section 8. For waste disposal, follow the recommendations in section 13 SECTION 7: HANDLING AND STORAGE PRECAUTIONS FOR SAFE HANDLING: Comply with the existing legislation on health and safety at work. General recommendations: Avoid any type of leakage or escape.Keep the container tightly closed. - Recommendations for the prevention of fire and explosion risks: Vapours are heavier than air, may spread along floors to a considerable distance, can form explosive mixtures with air and are able to reach distant ignition sources and flame up or explode Due to its flammability, this material should only be used in areas from which all naked lights and other sources of ignition have been excluded and away from other heat or electrical sources. Switch mobile phones off and do not smoke. If this product is used in an industrial installation, the zones with risc of explosion should be marked. Use instruments, systems and protective equipment adequate to the classification of zones, according to the health and safety at work laws, in accordance with Directive 2016/34/EU and 99/92/EC. Electrical equipment should be protected to the appropriate standard. No tools with a potential for sparks should be used.Elaborate the document "Protection against explosions". Flashpoint 22 °C CLP 2.6.4.3. Autoignition temperature: -9.999 °C - Recommendations for the prevention of toxicological risks: Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8. - Recommendations for the prevention of environmental contamination: Avoid any spillage in the environment.Pay special attention to the cleaning water. In the case of accidental spillage, follow the instructions indicated in section 6. CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: # Forbid the entry to unauthorized persons. Keep out of reach of children. This product should be stored isolated from heat and electrical sources. Do not smoke in storage area. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. Keep container in a well-ventilated place. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10. - Class of store: According to current legislation. - Maximum storage period: Not available. - Temperature interval: min:5 °C, max:30 °C (recommended). - Incompatible materials: Keep away from oxidizing agents, acids, metals, alkalis, amines, peroxides, reducing agents, heavy-metal compounds, polymerization initiators. Type of packaging: According to current legislation. Limit quantity (Seveso III): Directive 2012/18/EU: - Named dangerous substances/mixtures:None - Hazard categories and lower-/upperthreshold quantities in tonnes (t): · Physical hazards: Highly flammable liquid and vapour. (P5c) (5000t/50000t). · Health hazards:Not applicable Environmental hazards:Not applicable Other hazards:Not applicable - Threshold quantity for the application of lower-tier requirements:5000 tons - Threshold quantity for the application of upper-tier requirements:50000 tons - Remarks: The qualifying quantities set out above relate to each establishment. The quantities to be considered for the application of the relevant Articles are the maximum quantities which are present or are likely to be present at any one time. Dangerous substances present at an establishment only in quantities equal to or less than 2 % of the relevant qualifying quantity shall be ignored for the purposes of calculating the total quantity present, if their location within an establishment is such that it cannot act as an initiator of a major accident elsewhere at that establishment. For more details, see note 4 of Annex I of the Seveso Directive.

SPECIFIC END USE(S): 7.3

SYSTEN

Version: 3

For the use of this product particular recommendations apart from that already indicated are not available. SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION 8.1 CONTROL PARAMETERS If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances. - OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL) WEL-STEL EH40/2005 WELs (United Year WEL-TWA Remarks

| Kingd | lom) 2018 | | ppm | mg/m3 | ppm | mg/m3 | |
|--------|-----------------------------|------|-----|-------|-----|-------|-----------------|
| Xylen | e (mixture of isomers) | 1996 | 100 | 434 | 150 | 651 | BMGV, A4 |
| Hydro | ocarbons, C7, n-alkanes, | 1976 | 400 | 1640 | 500 | 2050 | |
| isoalk | anes, cyclics | | | | | | |
| n-buty | yl acetate | 2015 | 50 | 237 | 150 | 713 | |
| 2-met | thoxy-1-methylethyl acetate | - | 50 | 275 | 100 | 550 | Sk, Recommended |
| Ethyl | acetate | 1979 | 400 | 1440 | - | - | |
| Methy | yl methacrylate | 2000 | 50 | 208 | 100 | 416 | Sc, A4 |

WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min).

BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association with a guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned).

Sk - Can be absorbed through the skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.

Sc - May cause sensitization by skin contact.

A4 - Non classified as carcinogenic in humans.

- Dermal (Sk):

Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed

- BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

This preparation contains the following substances that have established a biological limit value:

- Xylenes: Biological determinant: methylhippuric acids in urine, BEI: 1.5 g/g creatinine, Sampling time: end of shift (2).

These indicators accumulate in the body during the work week, therefore the sampling time is critical in relation to previous exposures. (2) When the end of the exposition not coincide with the end of the working day, the sample will be taken as soon as possible after the real exposition ceases. Once the steady state that depends on each biological indicator (weeks, months) has been reached, sampling of these can be done at any time. & The biological determinant is an indicator of exposure to the chemical, but the quantitative interpretation of the measurement is ambiguous. &(CDC: Guidelines for the identification and management of lead exposure in pregnant and lactating women, 2010)

- DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

It is recommended to install water taps or sources with clean water close to the working area.Barrier creams may help to protect the exposed areas of the skin.Barrier creams should not be applied once exposure has occurred.

OCCUPATIONAL EXPOSURE CONTROLS: REGULATION (EU) NO. 2016/425:

As a general measure on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE), with the corresponding marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, CEN norm, etc..), you should consult the informative brochures provided by the manufacturers of PPE.

QUICK TEX THICK BLACK Code : 5004-001036

Previous revision: 09/08/2023

Date of printing: 09/08/2023

INFORMATION ON LIKELY ROUTES OF EXPOSURE: ACUTE TOXICITY:

| Routes of exposure | Acute toxicity | Cat. | Main effects, acute and/or delayed | Criteria |
|-------------------------------|---------------------|-------------------|--|---------------------|
| Inhalation: Not classified | ATE > 20000 mg/m3 | - | Not classified as a product with acute toxicity if inhaled (based on available data, the classification criteria are not met). | GHS/CLP 3.1.3.6. |
| Skin: Not classified | ATE > 5000 mg/kg bw | - | Not classified as a product with acute toxicity in contact with skin (based on available data, the classification criteria are not met). | |
| Eyes: Not classified | Not available. | - | Not classified as a product with acute toxicity by eye contact (lack of data). | GHS/CLP 1.2.5. |
| Ingestion: Not classified | ATE > 2000 mg/kg bw | Not available. | Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not met). | GHS/CLP 3.1.3.6. |

GHS/CLP 3.1.3.6: Classification of mixtures based on ingredients of the mixture (additivity formula).

CORROSION / IRRITATION / SENSITISATION :

| Danger class | Target organs | Cat. | Main effects, acute and/or delayed | Criteria |
|--|-------------------|-------|---|-------------------------------|
| - Respiratory corrosion/irritation: | Respiratory tract | Cat.3 | | GHS/CLP 1.2.6. 3.8.3.4. |
| - Skin corrosion/irritation: | Skin | Cat.2 | IRRITANT: Causes skin irritation. | GHS/CLP 3.2.3.3. |
| - Serious eye damage/irritation: | Eyes | Cat.2 | - , | GHS/CLP 3.3.3.3. |
| - Respiratory sensitisation: Not classified | - | - | 1 3 3 | GHS/CLP 3.4.3.3. |
| - Skin sensitisation: Not classified | - | - | Not classified as a product sensitising by skin contact (based on available data, the classification criteria are not met). | GHS/CLP 3.4.3.3. |

GHS/CLP 3.2.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.3.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.4.3.3: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components. GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

- ASPIRATION HAZARD:

| Danger class | Target organs | Cat. | Main effects, acute and/or delayed | Criteria |
|--|---------------|------|--|----------------------|
| - Aspiration hazard: Not classified | - | | ······································ | GHS/CLP 3.10.3.3. |

GHS/CLP 3.10.3.3: Classification of the mixture when data are available for all components or only for some components.

SPECIFIC TARGET ORGANS TOXICITY (STOT): Single exposure (SE) and/or Repeated exposure (RE):

| Effects | SE/RE | Target organs | Cat. | Main effects, acute and/or delayed | Criteria |
|--|-------|-------------------|-------|---|---------------------|
| - Neurological: | re | Hearing system | Cat.2 | NEUROTOXIC: May cause damage to hearing organs through prolonged or repeated exposure if inhaled (loss of audition). | GHS/CLP 3.8.3.4 |
| Respiratory effects: | se 🜔 | Respiratory tract | Cat.3 | IRRITANT: May cause respiratory irritation. | GHS/CLP 3.8.3.4 |
| - Neurological: | se 🜔 | CNS | Cat.3 | NARCOSIS: May cause drowsiness or dizziness if inhaled. | GHS/CLP 3.8.3.4. |

GHS/CLP 3.8.3.4: Classification of the mixture when data are available for all components or only for some components.

CMR EFFECTS:

Carcinogenic effects:

It is not considered as a carcinogenic product.

<u>- Genotoxicity:</u>

It is not considered as a mutagenic product.

- Toxicity for reproduction:

OTHER ADVERSE EFFECTS: 12.7 - Ozone depletion potential: Not available.

- Photochemical ozone creation potential: Not available. Earth global warming potential:

In case of fire or incineration liberates CO2.

SECTION 13: DISPOSAL CONSIDERATIONS

WASTE TREATMENT METHODS: Directive 2008/98/EC~Regulation (EU) no. 1357/2014: 13.1

Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8. Disposal of empty containers:Directive 94/62/EC~2015/720/EU, Decision 2000/532/EC~2014/955/EU: Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With

contaminated containers and packaging, adopt the same measures as for the product in itself.

Procedures for neutralising or destroying the product:

Controlled incineration in special facilities for chemical waste, in accordance with local regulations.
