

Code: 5011-006050

Version: 1 Date of issue: 30/11/2023 Date of printing: 30/11/2023

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 PRODUCT IDENTIFIER:

QUICKCLEAR LACQUER GLOSS 400ML

Code: 5011-006050 (CAS: 115-10-6 EC: 204-065-8) UFI: RG78-7QUG-E01K-SAN6

REACH REGISTER:
Register name:
Dimethyl ether
Register number:
01-2119472128-37

1.2 RELEVANT IDENTIFIED USES OF THE SUBSTANCE OR MIXTURE AND USES ADVISED AGAINST:

Intended uses (main technical functions): [X] Industrial [X] Professional [X] Consumers

Propellant gas in aerosols.

Sectors of use (use as such or as a ingredient in mixtures):

Industrial manufacturing (SU3). Industrial.

Manufacture of bulk, large scale chemicals (SU8). Industrial.

Manufacture of fine chemicals (SU9). Industrial.

Formulation (mixing) of preparations and/or re-packaging (SU10). Industrial, Professional.

Manufacture of plastic products (SU12). Industrial, Professional.

Manufacture of other non-metallic mineral products (SU13). Industrial, Professional.

Building and construction work (SU19). Industrial, Professional, Consumers.

Consumer uses (SU21). Consumers.

Professional uses (SU22). Professional.

Other activities (See NACE codes) (SU0). Industrial, Professional, Consumers.

Use in manufacture, formulation or application processes (relevant uses):

Manufacture of the substance, Industrial.

Use as an intermediate and feedstock without strict control, Industrial.

Formulation of mixtures and/or re-packaging, Industrial.

Use as a fuel, Professional.

Use of blowing agents in manufacture of foam, Industrial, Professional.

Service life of foam article, Consumers.

Use of propellants, Industrial, Professional, Consumers.

Degreasing and/or drying agent of animal skins, Industrial.

#### Use in products (relevant product categories):

Adhesives, sealants (PC1). Air care products (PC3). Anti-freeze and de-icing products (PC4). Biocidal products (PC8). Coatings and paints, thinners, paint removers (PC9a). Metal surface treatment products (PC14). Non-metal surface treatment products (PC15). Intermediate (PC19). Laboratory chemicals (PC21). Leather tanning, dye, finishing, impregnation, leather care products (PC23). Lubricants, greases, release products (PC24). Metal-working fluids (PC25). Paper and board dye, finishing and impregnation products (PC26). Plant protection products (PC27). Pharmaceuticals (PC29). Polishes and wax blends (PC31). Polymer preparations and compounds (PC32). Textile dyes, finishing and impregnating products (PC34). Washing and cleaning products (PC35). Welding and soldering products (PC38). Cosmetics, personal care products (PC39).

Use in artícles (relevant article categories):

Plastic articles (AC13).

Uses advised against:

This product is not recommended for any use or sector of use (industrial, professional or consumer) other than those previously listed as "Intended or identified uses".

Restrictions on manufacture, placing on market and use, according to Annex XVII of Regulation (EC) No. 1907/2006: Not restricted.

## 1.3 DETAILS OF THE SUPPLIER OF THE SAFETY DATA SHEET:

CAR REPAIR SYSTEM S.A.

Pol.Ind. 2 de Octubre, c/ José Muñoz 6 - 18320 Santa Fe - Granada ESPAÑA

Phone number: (+34) 95 8431792 - www.carrepairsystem.eu

- E-mail address of the person responsible for the Safety Data Sheet:

info@carrepairsystem.eu

1.4 <u>EMERGENCY TELEPHONE NUMBER:</u>

(+34) 95 8431792 L-J 8:30-14 / 15-18 h. V 8:30-14:30 h.

#### SECTION 2 : HAZARDS IDENTIFICATION

## 2.1 CLASSIFICATION OF THE SUBSTANCE OR MIXTURE:

Classification in accordance with Regulation (EU) No. 1272/2008~2021/849 (CLP):

 $DANGER: Aerosol\ 1: H222|Skin\ Irrit.\ 2: H315|Eye\ Dam.\ 1: H318|STOT\ SE\ (narcosis)\ 3: H336|Aquatic\ Chronic\ 3: H412|EUH066|Aerosol\ 3: H229$ 

| Danger class     |            | Classification of the substance  | Cat.           | Routes of exposure | Target organs | Effects  |
|------------------|------------|----------------------------------|----------------|--------------------|---------------|--|
| Physicochemical: |            | Aerosol 1:H222<br>Aerosol 3:H229 | Cat.1<br>-     | -<br>-             | -             | -  |
| Human health:    | <b>~ ~</b> | Eye Dam. 1:H318                  | Cat.1<br>Cat.3 | Eyes<br>Inhalation | Eyes<br>CNS   | Irritation<br>Serious lesions<br>Narcosis<br>Dryness, Cracking |
| Environment:     |            | Aquatic Chronic 3:H412           | Cat.3          | -                  | -             | -  |

Code: 5011-006050

**Version: 1 Date of issue: 30/11/2023** Date of printing: 30/11/2023

Full text of hazard statements mentioned is indicated in section 16.

#### 2.2 LABEL ELEMENTS:

This product is labelled with the signal word DANGER in accordance with Regulation (EU) No. 1272/2008~2021/849 (CLP).

#### - Hazard statements:

H222 Extremely flammable aerosol.

H229 Pressurised container: may burst if heated.

H315 Causes skin irritation. H318 Causes serious eye damage.

H336 Causes serious eye damage.

May cause drowsiness or dizziness.

H412 Harmful to aquatic life with long lasting effects.

#### - Precautionary statements:

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children. P103 Read label before use.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P211 Do not spray on an open flame or other ignition source.

P251 Do not pierce or burn, even after use.

P261 Avoid breathing vapours.

P271 Use only outdoors or in a well-ventilated area.

P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

P501 Dispose of contents/container to hazardous or special waste collection point.

- Supplementary statements:

#### None

## - Substances that contribute to classification:

Acetone (EC No. 200-662-2) n-butyl acetate (EC No. 204-658-1) Butan-1-ol (EC No. 200-751-6)

Hydrocarbons C9 aromatics (ÉC No. 918-668-5)

## 2.3 OTHER HAZARDS:

In high concentrations may have narcotic effects. In high concentrations may cause asphyxiation and the victim may not be aware of asphyxiation.

## - Other physicochemical hazards:

No other relevant adverse effects are known.

## - Other adverse human health effects:

No other relevant adverse effects are known.

- Other negative environmental effects:

Do not fulfil the PBT/vPvB criteria.

**Endocrine disrupting properties:** 

This product does not contain substances with endocrine disrupting properties identified or under evaluation.

Code: 5011-006050

**Version: 1 Date of issue: 30/11/2023** Date of printing: 30/11/2023

#### Impurities:

Does not contain other components or impurities which will influence the classification of the product.

## Stabilizers:

None.

## Reference to other sections:

For more information on hazardous ingredients, see sections 8, 11, 12 and 16.

## SUBSTANCES OF VERY HIGH CONCERN (SVHC):

List updated by ECHA on 14/06/2023.

Substances SVHC subject to authorisation, included in Annex XIV of Regulation (EC) no. 1907/2006:

None.

Substances SVHC candidate to be included in Annex XIV of Regulation (EC) no. 1907/2006:

None.

Persistent, bioaccumulable and toxic PBT, or very persistent and very bioaccumulable vPvB substances:

Do not fulfil the PBT/vPvB criteria.

POP substances included in the (EU) REGULATION 2019/1021~2020/784 on persistent organic pollutants:

None.

## 3.2 MIXTURES:

Not applicable (substance).

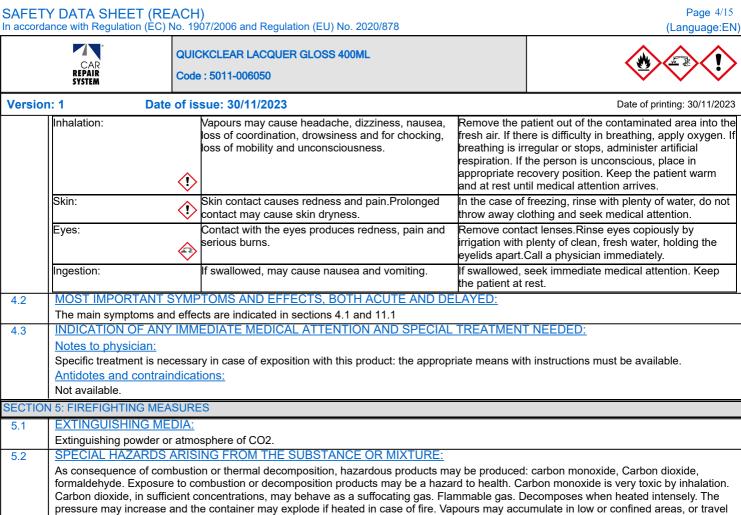

## SECTION 4: FIRST AID MEASURES

## 4.1 DESCRIPTION OF FIRST AID MEASURES:

Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure. Wear protective gloves when administering first aid

| Route of exposure Symptoms and effects, acute and delayed | Description of first-aid measures |
|---|-----------------------------------|
|---|-----------------------------------|

#### a considerable distance to a source of ignition and flash back. ADVICE FOR FIREFIGHTERS: 5.3

#### Special protective equipment:

Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or is not being used, combat fire from a sheltered position or from a safe distance. The standard EN469 provides a basic level of protection for chemical incidents.

Cool with water the tanks, cisterns or containers close to sources of heat or fire. Do not extinguish a leaking gas flame unless absolutely necessary since spontaneous explosive re-ignition may occur. Do not allow fire-fighting residue to enter drains, sewers or water courses.

Code: 5011-006050

Version: 1 Date of issue: 30/11/2023 Date of printing: 30/11/2023

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES:

Avoid direct contact with this product. Avoid breathing vapours. Keep people without protection in opposition to the wind direction.

6.2 ENVIRONMENTAL PRECAUTIONS:

Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations.

6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP:

Contain and mop up spills with absorbent materials (sawdust, earth, sand, vermiculite, diatomaceous earth, etc..). Keep the remains in a closed container.

6.4 REFERENCE TO OTHER SECTIONS:

For contact information in case of emergency, see section 1.

For information on safe handling, see section 7.

For exposure controls and personal protection measures, see section 8.

For waste disposal, follow the recommendations in section 13.

## SECTION 7: HANDLING AND STORAGE

## 7.1 PRECAUTIONS FOR SAFE HANDLING:

Comply with the existing legislation on health and safety at work.

- General recommendations:

Avoid any type of leakage or escape. Keep the container tightly closed.

- Recommendations for the prevention of fire and explosion risks:

Not applicable.

Flashpoint -9.999 °C CLP 2.6.4.3.

Autoignition temperature: 240 °C

- Recommendations for the prevention of toxicological risks:

Do not eat, drink or smoke while handling. After handling, wash hands with soap and water. For exposure controls and personal protection measures, see section 8.

- Recommendations for the prevention of environmental contamination:

Avoid any spillage in the environment. Pay special attention to the cleaning water. In the case of accidental spillage, follow the instructions indicated in section 6.

## 7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:

Forbid the entry to unauthorized persons. Keep out of reach of children. Keep away from sources of heat. If possible, avoid direct contact with sunlight. Avoid extreme humidity conditions. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical position. For more information, see section 10.

- Class of store:

According to current legislation.

- Maximum storage period:

120 Months.

- Temperature interval:

min:5 °C, max:30 °C (recommended).

- Incompatible materials:

Keep away from oxidizing agents, acids, metals, anhydrides.

Type of packaging:

According to current legislation.

- Limit quantity (Seveso III): Directive 2012/18/EU:
- Named dangerous substances/mixtures:None
- Hazard categories and lower-/upperthreshold quantities in tonnes (t):
- · Physical hazards:Extremely flammable aerosol. (P3a) (150t/500t neto).
- Health hazards:Not applicable
- · Environmental hazards:Not applicable
- Other hazards:Not applicable
- Threshold quantity for the application of lower-tier requirements:150 (neto) tons
- Threshold quantity for the application of upper-tier requirements:500 (neto) tons

#### - Remarks:

The qualifying quantities set out above relate to each establishment. The quantities to be considered for the application of the relevant Articles are the maximum quantities which are present or are likely to be present at any one time. Dangerous substances present at an establishment only in quantities equal to or less than 2 % of the relevant qualifying quantity shall be ignored for the purposes of calculating the total quantity present, if their location within an establishment is such that it cannot act as an initiator of a major accident elsewhere at that establishment. For more details, see note 4 of Annex I of the Seveso Directive.

## 7.3 SPECIFIC END USE(S):

For the use of this product particular recommendations apart from that already indicated are not available.

Code: 5011-006050

**Version: 1 Date of issue: 30/11/2023** Date of printing: 30/11/2023

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1 CONTROL PARAMETERS

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

## - OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)

| EH40/2005 WELs (United                                      | Year | WEL-TWA |       | WEL-STEL |       | Remarks         |

| 2-methoxy-1-methylethyl acetate                             | -    | 50      | 275   | 100      | 550   | Sk, Recommended |
| Reaction mass of ethylbenzene and m-<br>xylene and p-xylene | 1996 | 100     | 434   | 150      | 651   | BMGV, A4        |

WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min).

BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association with a guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned).

Sk - Can be absorbed through the skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.

A4 - Non classified as carcinogenic in humans.

#### - Dermal (Sk):

Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed.

## - BIOLOGICAL LIMIT VALUES:

Biological monitoring can be a very useful complementary technique to air monitoring when air sampling techniques alone may not give a reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their metabolites in tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption of a substance by all routes. Biological monitoring may be particularly useful in circumstances where there is likely to be significant skin absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective equipment, where there is a reasonably well-defined relationship between biological monitoring and effect, or where it gives information on accumulated dose and target organ body burden which is related to toxicity.

Substances that have established a biological limit value:

-

## - DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

(-) - PNEC not available (without data of registration REACH).

n/b - PNEC not derived (not bioaccumulative potential).

s/r - PNEC not derived (not identified hazard).

8.2 EXPOSURE CONTROLS:

## **ENGINEERING MEASURES:**

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of particulates and vapours below the Occupational Exposure Limits, suitable respiratory protection must be worn.

#### - Protection of respiratory system:

Avoid the inhalation of vapours.

## - Protection of eyes and face:

Install water taps, sources or eyewash bottles with clean water close to the working area.

#### - Protection of hands and skin:

It is recommended to install water taps or sources with clean water close to the working area.Barrier creams may help to protect the exposed areas of the skin.Barrier creams should not be applied once exposure has occurred.

#### OCCUPATIONAL EXPOSURE CONTROLS: REGULATION (EU) NO. 2016/425:

As a general measure on prevention and safety in the work place, we recommend the use of a basic personal protection equipment (PPE), with the corresponding marking. For more information on personal protective equipment (storage, use, cleaning, maintenance, type and characteristics of the PPE, protection class, marking, category, CEN norm, etc..), you should consult the informative brochures provided by the manufacturers of PPE

| he manufacturers o | · · · · · · · · · · · · · · · · · · ·   |
|--------------------|---|
| Mask:              | No.   |
| Safety goggles:    | Safety goggles with suitable lateral protection (EN166).Clean daily and disinfect at regular intervals in accordance with the instructions of the manufacturer.   |
| Face shield:       | No.   |
| Gloves:            | Fluorocarbon rubber gloves, thick >0.7 mm (EN374). Recommended minimal level 3, breakthrough time >60 min (protection for permanent contact). When short contact with the product is expected, use gloves with a protection level 2 or higher should be used, with a breakthrough time >30 min. The breakthrough time of the selected glove material should be in accordance with the pretended period of use. There are several factors (for example, temperature), they do in practice the period of use of a protective gloves resistant against chemicals is clearly lower than the established standard EN374. For the selection of a specific type of gloves for specific applications, with certain duration, it should take into account relevant factors to the workplace (without limitation to them), such as: Due to the wide variety of circumstances and possibilities, the instructions/specifications provided by the glove supplier should be taken into account. If used in solution or mixed with other substances, or under conditions different from the EN374, please contact the supplier of the approved gloves. The gloves should be immediately replaced when any sign of degradation is noted. |

| Apron:             | Yes.<br>✓   |
| Clothing:          | Advisable.  |

## - Thermal hazards:

Not applicable (the product is handled at room temperature).

#### **ENVIRONMENTAL EXPOSURE CONTROLS:**

Avoid any spillage in the environment. Avoid any release into the atmosphere.

#### - Spills on the soil:

Prevent contamination of soil.

### - Spills in water:

Do not allow to escape into drains, sewers or water courses.

## -Water Management Act:

This product does not contain any substance included in the list of priority substances in the field of water policy under Directive 2000/60/EC~2013/39/EU.

#### - Emissions to the atmosphere:

Because of volatility, emissions to the atmosphere while handling and use may result. Avoid any release into the atmosphere.

Date of printing: 30/11/2023 Version: 1 Date of issue: 30/11/2023

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

INFORMATION ON BASIC PHYSICAL AND CHEMICAL PROPERTIES: 9.1

**Appearance** 

Physical state: Gas Colour: Colourless Odour: Characteristic Odour threshold: 0,08 ppm

Change of state

Not available (dissolution). Melting point: Initial boiling point: 100,4 °C at 760 mmHg

- Flammability:

-9.999 °C CLP 2.6.4.3. Flashpoint

Lower/upper flammability or explosive limits: Not available Autoignition temperature: 240 °C

Stability

Decomposition temperature: Not available (lack of data).

pH-value

pH: Not applicable

- Viscosity:

Dynamic viscosity: 0,53 cps at 20°C

- Solubility(ies):

Solubility in water 4,56 g/l at 20°C

Liposolubility: Not applicable (inorganic substance).

Partition coefficient: n-octanol/water: 0,07 (as log Pow)

- Volatility:

Vapour pressure: Not applicable. Vapour pressure: 300 kPa at 50°C

Evaporation rate: Not available (lack of data).

**Density** 

Relative density: 0,781 at 20/4°C Relative water

Relative vapour density: Not available.

Particle characteristics

Particle size: Not available.

- Explosive properties:

In the molecule there is no chemical groups associated with explosive properties.

- Oxidizing properties:

Not classified as oxidizing product.

9.2 OTHER INFORMATION:

Information regarding physical hazard classes

Aerosol sprays: Extremely flammable aerosol.

Other security features:

Molecular weight (numeric): 100,12 g/mol Surface tension: 28,0 din/cm at 20°C 7720 Kcal/kg Heat of combustion: VOC (supply): Not available.

The values indicated do not always coincide with product specifications. The data for the product specifications can be found in the corresponding technical data sheet. For additional information concerning physical and chemical properties related to safety and environment, see sections 7 and 12.

| SECTION | N 10: STABILITY AND REACTIVITY   |                           |
| 10.1    | REACTIVITY:  |                           |
|         | - Corrosivity to metals:   |                           |
|         | It is not corrosive to metals.   |                           |
|         | - Pyrophorical properties:   |                           |
|         | It is not pyrophoric.  |                           |
| 10.2    | CHEMICAL STABILITY:  |                           |
|         | Stable under recommended storage and handling conditions. Does not polymerize.   |                           |
| 10.3    | POSSIBILITY OF HAZARDOUS REACTIONS:  |                           |
|         | Possible dangerous reaction with oxidizing agents, acids, metals, anhydrides.  |                           |
| 10.4    | CONDITIONS TO AVOID:   |                           |
|         | - Heat:  |                           |
|         | Keep away from sources of heat.  |                           |
|         | - Light:   |                           |
|         | If possible, avoid direct contact with sunlight.   |                           |
|         | <u>- Air:</u>  |                           |
|         | The product is not affected by exposure to air, but should not be left the containers open.  |                           |
|         | - Humidity:  |                           |
|         | Avoid extreme humidity conditions.   |                           |
|         | - Pressure:  |                           |
|         | Not relevant.  |                           |
|         | - Shock:   |                           |
|         | The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough dents and breakage of packaging, especially when the product is handled in large quantities, and during loading and do |                           |
| 10.5    | INCOMPATIBLE MATERIALS:  |                           |
|         | Keep away from oxidizing agents, acids, metals, anhydrides.  |                           |
| 10.6    | HAZARDOUS DECOMPOSITION PRODUCTS:  |                           |
|         | As consequence of thermal decomposition, hazardous products may be produced: formaldehyde.   |                           |
|         |  |                           |

#### SECTION 11: TOXICOLOGICAL INFORMATION

#### INFORMATION ON HAZARD CLASSES AS DEFINED IN REGULATION (EC) NO 1272/2008: 11.1 **ACUTE TOXICITY:**

| Dose and lethal concentrations             | DL50 (OECD401) | DL50 (OECD402)           | CL50 (OECD403)      |

## **CMR EFFECTS:**

- Carcinogenic effects:

It is not considered as a carcinogenic product.

- Genotoxicity:

It is not considered as a mutagenic product.

- Toxicity for reproduction:

Does not harm fertility. Does not harm the unborn child.

- Effects via lactation:

Not classified as a hazardous product for children breast-fed.

DELAYED AND IMMEDIATE EFFECTS AS WELL AS CHRONIC EFFECTS FROM SHORT AND LONG-TERM EXPOSURE:

Code: 5011-006050

Version: 1 Date of issue: 30/11/2023 Date of printing: 30/11/2023

#### Routes of exposure

May be absorbed by inhalation of vapour, through the skin and by ingestion.

## - Short-term exposure:

Irritating to eyes, respiratory system and skin.

#### - Long-term or repeated exposure:

Repeated or prolonged contact may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

## **INTERACTIVE EFFECTS:**

Not available.

## INFORMATION ABOUT TOXICOCINETICS, METABOLISM AND DISTRIBUTION:

#### Dermal absorption:

Substances for which dermal absorption can be very high: Xylene (mixture of isomers), Reaction mass of ethylbenzene and m-xylene and p -xylene, Butan-1-ol, 2-methoxy-1-methylethyl acetate.

## - Basic toxicokinetics:

Not available.

## **ADDITIONAL INFORMATION:**

Not available.

#### **INFORMATION ON OTHER HAZARDS:** 11.2

#### **Endocrine disrupting properties:**

This product does not contain substances with endocrine disrupting properties identified or under evaluation.

Other information:

No additional information available.

## SECTION 12: ECOLOGICAL INFORMATION

|      | T 0 \ / / 0 |       |

| 2-methoxy-1-methylethyl acetate | 1520 | 22 | 78 90 | Easy |

Note: Biodegradability data correspond to an average of data from various bibliographic sources.

- Hvdrolvsis:

Not applicable (the molecule does not contain hydrolysable functional groups).

- Photodegradability:

Because of indirect photochemical reactions, it is oxided in the atmosphere mainly in contact with hydroxyl radicals, under the influence of sunlight. Degradation in the atmospheric environment is expected within a few days.

## 12.3 BIOACCUMULATIVE POTENTIAL:

It is unlikely to bioaccumulate.

| Bioaccumulation                            | logPow |      | BCF          | Potential         |
|--|--------|------|--------------|-------------------|
| for individual ingredients                 |        |      | L/kg         |                   |
| Xylene (mixture of isomers)                | 3.16   | 56.5 | (calculated) | Low               |
| Reaction mass of ethylbenzene and m-xylene | 3.16   | 56   | (calculated) | Low               |
| and p-xylene                               |        |      |              |                   |
| Hydrocarbons C9 aromatics                  | 3.3    | 69.9 | (calculated) | Low               |
| Dimethyl ether                             | 0.07   | 1.7  | (calculated) | Unlikely, low     |
| Butan-1-ol                                 | 0.88   | 3.2  | (calculated) | No bioaccumulable |
| Acetone                                    | -0.24  | 3.2  | (calculated) | No bioaccumulable |
| n-butyl acetate                            | 1.81   | 6.9  | (calculated) | No bioaccumulable |
| 2-methoxy-1-methylethyl acetate            | 0.56   | 3.2  | (calculated) | No bioaccumulable |

#### 12.4 MOBILITY IN SOIL:

Not available

| Mobility                                   | log Poc |                    | Potential         |
|--|---------|--------------------|-------------------|
| for individual ingredients                 |         | Pa⋅m3/mol 20°C     |                   |
| Xylene (mixture of isomers)                | 2,25    | 660 (calculated)   | Low               |
| Reaction mass of ethylbenzene and m-xylene | 2,25    | 660 (calculated)   | Low               |
| and p-xylene                               |         |                    |                   |
| Hydrocarbons C9 aromatics                  | 2,96    | 440 (calculated)   | Low               |
| Dimethyl ether                             | 0,89    | 518,6 (calculated) | Unlikely, low     |
| Butan-1-ol                                 | 0,39    | 0,63 (calculated)  | No bioaccumulable |
| Acetone                                    | 0,99    | 3 (calculated)     | No bioaccumulable |
| n-butyl acetate                            | 1,84    | 28,5 (calculated)  | No bioaccumulable |
| 2-methoxy-1-methylethyl acetate            | 0,23    | 0,42 (calculated)  | No bioaccumulable |

## 12.5 RESULTS OF PBT AND VPVB ASSESMENT: (Annex XIII of Regulation (EC) no. 1907/2006:)

Do not fulfil the PBT/vPvB criteria: Half-life in the marine environment < 60 days,Half-life in fresh-water or estuarine < 40 days,Half-life in marine sediments < 180 days,Half-life in sediments of fresh-water or estuarine < 120 days,Half-life in the soil < 120 days,Bioconcentration factor BCF < 2000,Long term 'No observed effect concentration' for fresh-water or marine organisms NOEC > 0.01 mg/l,It is NOT classified as CMR,It has NO endocrine disrupting potential.

## 12.6 ENDOCRINE DISRUPTING PROPERTIES:

This product does not contain substances with endocrine disrupting properties identified or under evaluation.

# 12.7 OTHER ADVERSE EFFECTS:

## Ozone depletion potential:

Not dangerous for the ozone layer. Substance not listed in Annex I to Regulation (EC) 2037/2000~1005/2009 on substances that deplete the ozone layer.

- Photochemical ozone creation potential:

It contributes relatively little to the formation of ozone in the troposphere.

- Earth global warming potential:

In case of fire or incineration liberates CO2.

#### SECTION 13: DISPOSAL CONSIDERATIONS

#### 13.1 WASTE TREATMENT METHODS:Directive 2008/98/EC~Regulation (EU) no. 1357/2014:

Take all necessary measures to prevent the production of waste whenever possible. Analyse possible methods for revaluation or recycling. Do not discharge into drains or the environment, dispose at an authorised waste collection point. Waste should be handled and disposed in accordance with current local and national regulations. For exposure controls and personal protection measures, see section 8.

#### Disposal of empty containers: Directive 94/62/EC~2015/720/EU, Decision 2000/532/EC~2014/955/EU:

Emptied containers and packaging should be disposed in accordance with currently local and national regulations. The classification of packaging as hazardous waste will depend on the degree of empting of the same, being the holder of the residue responsible for their classification, in accordance with Chapter 15 01 of Decision 2000/532/EC, and forwarding to the appropriate final destination. With contaminated containers and packaging, adopt the same measures as for the product in itself.

Procedures for neutralising or destroying the product:

Controlled incineration in special facilities for chemical waste, in accordance with local regulations. Do not incinerate closed containers.

|                                      | Ensure that persons transporting the product know what to do in case of accident or spill. Always transport in closed containers that are |  |                              |

## SECTION 15: REGULATORY INFORMATION

15.1 SAFETY, HEALTH AND ENVIRONMENTAL REGULATIONS/LEGISLATION SPECIFIC FOR THE SUBSTANCE OR MIXTURE:

The regulations applicable to this product generally are listed throughout this Safety Data Sheet.

MARITIME TRANSPORT IN BULK ACCORDING TO IMO INSTRUMENTS:

Restrictions on manufacture, placing on market and use:

See section 1.2

Not applicable.

14.7

Tactile warning of danger:

Not applicable (the classification criteria are not met).

upright and secure. Ensure adequate ventilation.

Child safety protection:

Not applicable (the classification criteria are not met).

ANNEX II: REPORTABLE EXPLOSIVES PRECURSORS

This product is regulated by Regulation (EU) 2019/1148: all suspicious transactions, and significant disappearances and thefts should be reported to the relevant national contact point. Please see https://home-affairs.ec.europa.eu/policies/internal-security/counter-terrorism-and-radicalisation/protection/legislation-chemicals-used-home-made-explosives en

**OTHER REGULATIONS:** 

Not available.

Control of the risks inherent in major accidents (Seveso III):

See section 7.2

Other local legislations:

The receiver should verify the possible existence of local regulations applicable to the chemical

15.2 CHEMICAL SAFETY ASSESSMENT:

A chemical safety assessment has been carried out for this product.

Code: 5011-006050

Version: 1 Date of issue: 30/11/2023 Date of printing: 30/11/2023

SECTION 16: OTHER INFORMATION

## 16.1 TEXT OF THE PHRASES AND NOTES REFERENCED IN SECTIONS 2 AND/OR 3:

#### Hazard statements according the Regulation (EU) No. 1272/2008~2021/849 (CLP), Annex III:

H220 Extremely flammable gas. H222 Extremely flammable aerosol. H225 Highly flammable liquid and vapour. H226 Flammable liquid and vapour. H280 Contains gas under pressure: may explode if heated. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H312 Harmful in contact with skin. H315 Causes skin irritation. H318 Causes serious eye damage. H319 Causes serious eye irritation. H332 Harmful if inhaled. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H411 Toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects. EUH066 Repeated exposure may cause skin dryness or cracking. H373 May cause damage to hearing organs through prolonged or repeated exposure if inhaled. H229 Pressurised container: may burst if heated.

## Notes related to the identification, classification and labelling of the substances or mixtures:

Note C: Some organic substances may be marketed either in a specific isomeric form or as a mixture of several isomers. In this case the supplier must state on the label whether the substance is a specific isomer or a mixture of isomers.

Note U (Table 3): When put on the market gases have to be classified as 'Gases under pressure', in one of the groups compressed gas, liquefied gas, refrigerated liquefied gas or dissolved gas. The group depends on the physical state in which the gas is packaged and therefore has to be assigned case by case. The following codes are assigned: Press. Gas (Comp.); Press. Gas (Liq.); Press. Gas (Ref. Liq.); Press. Gas (Diss.). Aerosols shall not be classified as gases under pressure (See Annex I, Part 2, Section 2.3.2.1, Note 2).

## ADVICES ON ANY TRAINING APPROPRIATE FOR WORKERS:

It is recommended for all staff that will handle this product to carry out a basic training in occupational risk and prevention, in order to provide understanding and interpretation of Safety Data Sheets and labelling of products as well.

- · International Maritime Dangerous Goods Code IMDG including Amendment 40-20 (IMO, 2020).

#### ABBREVIATIONS AND ACRONYMS:

List of abbreviations and acronyms that can be used (but not necessarily used) in this Safety Data Sheet:

- · REACH: Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals.
- GHS: Globally Harmonized System of Classification and Labelling of Chemicals of the United Nations.
- · CLP: European regularion on Classificatin, Labelling amd Packaging of substances and chemical mixtures.
- · EINECS: European Inventory of Existing Commercial Chemical Substances.
- · ELINCS: European List of Notified Chemical Substances.
- · CAS: Chemical Abstracts Service (Division of the American Chemical Society).
- · UVCB: Substances of Unknown or Variable composition, complex reaction products or biological materials.
- · SVHC: Substances of Very High Concern.
- · PBT: Persistent, bioaccumulable and toxic substances.
- vPvB: Very persistent and very bioaccumulable substances.
- · VOC: Volatile Organic Compounds.
- · DNEL: Derived No-Effect Level (REACH).
- · PNEC: Predicted No-Effect Concentration (REACH).
- · LC50: Lethal concentration, 50 percent.
- · LD50: Lethal dose, 50 percent.
- · UN: United Nations Organisation.
- · ADR: European agreement concerning the international carriage of dangeous goods by road.
- · RID: Regulations concerning the international transport of dangeous goods by rail.
- · IMDG: International Maritime code for Dangerous Goods.
- · IATA: International Air Transport Association.
- · ICAO: International Civil Aviation Organization.

## SAFETY DATA SHEET REGULATIONS:

Safety Data Sheet in accordance with Article 31 of Regulation (EC) No. 1907/2006 (REACH) and Annex of Regulation (EU) No. 2020/878.

HISTORIC: REVISION: Version: 1 30/11/2023

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users" working conditions are beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product"s properties.
